SUBJECT INDEX TO VOLUME 68, 1989

EXPLANATION OF SYMBOLS

The page number on which an article begins is listed at the end of that article's title. An article may appear under more than one heading.

Author names are listed alphabetically. Numbers listed after each name are the page numbers of the article(s) on which their name appears.

Page numbers followed by @ represent conference reports. Page numbers followed by * indicate editorials. Page numbers followed by ! indicate a presentation at the 11th International Conference on Oral Biology.

ABNORMALITIES

Conference Report: advances in craniofacial developmental biology and their clinical implications. Report on a symposium... Sperber, G.H., 1294@

ABSTRACTS

Abstracts, IADR/ADDR, 170-418, 855-1025
Divisional abstracts, 523-743
Guest editorial: on reviewing and rejecting abstracts. McHugh, W.D., 78*

ACETYLCHOLINE

Vasoactive intestinal peptide interacts with alpha-adrenergic-, cholinergic-, and substance-P mediated responses in rat parotid and submandibular glands. Bobyock, E. and Chernick, W.S., 1489

ACETYLCYSTEINE

N-Acetylcysteine, a mucolytic agent as a plaque inhibitor. Bowles, W.H., 1698!

ACID PHOSPHATASE

Changes in the tartrate-resistant acid phosphatase cell population in dental follicles and bony crypts of rat molars during tooth eruption. Wise, G.E. and Fan, W., 150

ACIDS, NONCARBOXYLIC

Difference in amounts between titratable acid and total carboxylic acids produced by oral streptococci during sugar metabolism. Iwami, Y., *et al.*, 16

ACIDULATED PHOSPHATE FLUORIDE (*see* **Sodium Fluoride**)

ACRYLIC RESINS

Mechanical properties of poly(alkyl a-fluoroacrylate)s as denture-base materials. Kurata, S. and Yamazaki, N., 481

ACTINOBACILLUS

Specific subgingival bacteria and diagnosis of gingivitis and periodontitis. Christersson, L.A., *et al.*, 1633!

ACTINOMYCES

Bacterial adhesion to oral tissues: a model for infectious diseases. Gibbons, R.J., 750
Effects of sustained-release chlorhexidine acetate on the human dental plaque flora. Schaeken, M.J.M. and De Haan, P., 119
Microflora associated with the development of initial enamel decalcification below orthodontic bands *in vivo* in children living in a fluoridated-water area, The. Boyar, R.M., *et al.*, 1734
Physiology of fluoride inhibition of oral bacteria. Marquis, R.E., 1694!
Relative adherence of *Bacteroides* species and strains to *Actinomyces viscosus* on saliva-coated hydroxyapatite. Li, 383 J. and Ellen, R.P., 1308
Specific subgingival bacteria and diagnosis of gingivitis and periodontitis. Christersson, L.A., *et al.*, 1633!

ADHESIVENESS (*see also* **Bacterial Adhesion**)

Effects of pellicle formation on streptococcal adhesion to human enamel and artificial substrata with various surface free-energies, The. Pratt-Terpstra, I.H., *et al.*, 463
Oligomers with pendant isocyanate groups as adhesives for dentin and other tissues. Lee, C.H. and Brauer, G.M., 484

ADHESIVES

Confocal optical microscope study of the morphology of the tooth/restoration interface using Scotchbond 2 dentin adhesive, A. Watson, T.F., 1124
Substitutes for N-phenylglycine in adhesive bonding to dentin. Johnston, A.D., *et al.*, 1337

ADOLESCENTS

Associations between salivary levels of *Streptococcus mutans*, lactobacilli, and caries experience in Kenyan adolescents. Beighton, D., *et al.*, 1242

ADSORPTION

Adsorption of 4-methacryloxyethyl trimellitate anhydride (4-META) on hydroxyapatite and its role in composite bonding. Misra, D.N., 42

AGED

Dental caries in adult and elderly Chinese. Luan, W.-M., *et al.*, 1771
Prevalence of and factors associated with root decay in older adults in Canada. Locker, D., *et al.*, 768

ALKALINE PHOSPHATASE

Changes in the tartrate-resistant acid phosphatase cell population in dental follicles and bony crypts of rat molars during tooth eruption. Wise, G.E. and Fan, W., 150
Initial characterization of cells derived from human periodontia. Piche, J.E., *et al.*, 761

AMELOGENESIS

Biophysical analyses of sequential bands of enamel related to ruffle-ended and smooth-ended maturation ameloblasts. McKee, M.D., *et al.*, 101
Changes in the tartrate-resistant acid phosphatase cell population in dental follicles and bony crypts of rat molars during tooth eruption. Wise, G.E. and Fan, W., 150
Possible function of matrix proteins in fluoride incorporation into enamel mineral during porcine amelogenesis. Aoba, T., *et al.*, 1162
Possible roles of partial sequences at N- and C-termini of amelogenin in protein-enamel mineral interaction. Aoba, T., *et al.*, 1331

AMELOGENESIS IMPERFECTA

Alteration of enamel proteins in hypomaturation amelogenesis imperfecta. Wright, J.T. and Eutler, W.T., 1328

AMINES

Protein dissimilation by human salivary-sediment bacteria. Reynolds, E.C., and Riley, P.F., 124

AMINO ACIDS

Alteration of enamel proteins in hypomaturation amelogenesis imperfecta. Wright, J.T. and Butler, W.T., 1328

AMMONIA

Protein dissimilation by human salivary-sediment bacteria. Reynolds, E.C., and Riley, P.F., 124

AMMONIUM COMPOUNDS

Modes of action of currently known chemical anti-plaque agents other than chlorhexidine. Scheie, A.AA., 1609!

AMYLASES

Genetics of human salivary proteins. Minaguchi, K., *et al.*, 2
Purification of lingual amylase from serous glands of rat tongue and characterization of rat lingual amylase and lingual lipase. Field, R.B., *et al.*, 139
Role of parotid amylase in starch digestion in the gastro-intestinal tracts of diabetic rats. Kurahashi, M. and Inomata, K., 1366

ANESTHESIA, DENTAL

Clinical trial of intraligamentary anesthesia, A. Edwards, R.W. and Head, T.W., 1210

ANESTHETICS, LOCAL

Changes in plasma epinephrine concentration after dental infiltration anesthesia with different doses of epinephrine. Knoll-Köhler, E., *et al.*, 1098

ANIMALS, LABORATORY

Chemical plaque control: what *in vitro* and

animal test systems are appropriate? Guggenheim, B. and Schmid, R., 1645!

ANTIBIOTICS

Antibacterial effect of the powdered semiconductor TiO_2 on the viability of oral microorganisms. Nagame, S., *et al.*, 1696!
Chemical plaque control: what *in vitro* and animal test systems are appropriate? Guggenheim, B. and Schmid, R., 1645!
Chlorhexidine and related compounds. Gjermo, P., 1602!
Microbiological observations at periodic subgingival antimicrobial irrigation of periodontal pockets. Dahlén, G., *et al.*, 1714!
Modes of action of currently known chemical anti-plaque agents other than chlorhexidine. Scheie, A.AA., 1609!
Modified model cavity method for assessing antibacterial properties of dental restorative materials, The. Meryon, S.D. and Johnson, S.G., 835

ANTIBODIES, BACTERIAL

Biochemical basis for control of plaque-related oral diseases in the normal and compromised host: periodontal diseases. Van Dyke, T.E. and Zinney, W.B., 1588!
Correlation between serum and gingival crevicular fluid antibodies and periodontal status. Horino, K., *et al.*, 1688!

ANTIPLAQUE AGENTS

Biostatistical and methodological issues in demonstrating efficacy of therapeutic agents for periodontal disease. DeRouen, T.A., 1661!
Chemical plaque control: what *in vitro* and animal test systems are appropriate? Guggenheim, B. and Schmid, R., 1645!
Chlorhexidine interactions with sodium lauryl sulfate *in vivo*. Barkvoll, P., *et al.*, 1722!
Clinical effectiveness of a 0.12% chlorhexidine mouthrinse over two years. Banting, D., *et al.*, 1716!
Computer model relating chemistry to biological activity of metal anti-plaque agents. Cummins, D. and Watson, G.K., 1702!
Criteria for efficacy of plaque control agents for caries. Stephen, K.W., 1672!
Criteria for efficacy of plaque control agents for periodontal disease: microbiology. Ranney, R.R., 1655!
Delivery of zinc and triclosan to micro-reservoirs of antibacterial activity. Gilbert, R.J., *et al.*, 1706!
Delivery systems for agents in supra- and subgingival plaque control. Van Der Ouderaa, F.J. and Cummins, D., 1617!
Design of trials to test the efficacy of plaque control agents for periodontal diseases in humans, The. Robertson, P.B., *et al.*, 1667!
Effect of a zinc citrate dentifrice on calculus formation, The. Gaare, D., 1710!
Effect of SnF_2 on gingivitis and periodontopathic micro-organisms. Tinanoff, N., *et al.*, 1727!
Effect of two years' use of 0.12% chlorhexidine on plaque bacteria. Briner, W., *et al.*, 1719!
Inhibition of plaque formation, prevention and treatment of gingivitis with sulfadiazines in beagles. Howell, T.H., *et al.*, 1712!
Maintenance of gingival health by a dentifrice containing zinc citrate and triclosan. Saxton, C.A., 1724!
Modes of action of currently known chemical anti-plaque agents other than chlorhexidine. Scheie, A.AA., 1609!
N-Acetylcysteine, a mucolytic agent as a plaque inhibitor. Bowles, W.H., 1698!
Non-antibacterial approach to prevent plaque formation, A. Giertsen, E., *et al.*, 1683!
Oral delivery of zinc from slurries and separated supernatant fractions of dentifrices. Tan-Walker, R.L.B. and Gilbert, R.J., 1708!
Pharmacokinetic principles controlling efficacy of oral therapy. Goodson, J.M., 1625!
Potential of xylitol, mannitol, and sorbose to inhibit metabolism in *Streptococcus sobrinus* OMZ 176. Assev, S., *et al.*, 1729!
Review of the guidelines for acceptance of chemotherapeutic products for the control of supragingival dental plaque and gingivitis. Page, R.C., 1640!
Stability of SnF_2-induced root-surface deposits *in vivo*, The. Ellingsen, J.E. and Rølla, G., 1700!

APATITES

Adsorbed salivary acidic proline-rich proteins contribute to the adhesion of *Streptococcus mutans* JBP to apatitic surfaces. Gibbons, R.J. and Hay, D.I., 1303

ARGININE

Catabolism of arginine-containing peptides by *Streptococcus sanguis*, The. Rogers, A.H., *et al.*, 1686!

ARTHROGRAPHY

Clinical *vs.* arthrographic diagnosis of TMJ internal derangement. Anderson, G.C., *et al.*, 826

ATROPINE

Effect of chronic atropine treatment on salivary composition and caries in rats, The. Watson, G.E., *et al.*, 1739

BACTERIA

Antibacterial effect of the powdered semiconductor TiO_2 on the viability of oral microorganisms. Nagame, S., *et al.*, 1696!
Associations between salivary levels of *Streptococcus mutans*, lactobacilli, and caries experience in Kenyan adolescents. Beighton, D., *et al.*, 1242
Biochemical basis for control of plaque-related oral diseases in the normal and compromised host: periodontal diseases. Van Dyke, T.E. and Zinney, W.B., 1588!
Criteria for efficacy of plaque control agents for periodontal disease: microbiology. Ranney, R.R., 1655!
Effect of SnF_2 on gingivitis and periodontopathic micro-organisms. Tinanoff, N., *et al.*, 1727!
Effect of two years' use of 0.12% chlorhexidine on plaque bacteria. Briner, W., *et al.*, 1719!
Effects of carbohydrate pulses and pH on population shifts within oral microbial communities *in vitro*. Bradshaw, D.J., *et al.*, 1298
Host defenses and microbial homeostasis: role of microbial interactions. Marsh, P.D., 1567!
Inhibition of bacterial growth under composite restorations following GLUMA pretreatment. Felton, D., *et al.*, 491
Microbiological observations at periodic subgingival antimicrobial irrigation of periodontal pockets. Dahlén, G., *et al.*, 1714!
Microbiological study of early caries of approximal surfaces in schoolchildren, A. Marsh, P.D., *et al.*, 1151
Modified model cavity method for assessing antibacterial properties of dental restorative materials, The. Meryon, S.D. and Johnson, S.G., 835
On changing the cariogenic chemistry of coronal plaque. Tanzer, J.M., 1576!
Oral gram-negative bacilli in bone marrow transplant patients given chlorhexidine rinses. Brown, A.T., *et al.*, 1199
Physiology of fluoride inhibition of oral bacteria. Marquis, R.E., 1694!
Protein dissimilation by human salivary-sediment bacteria. Reynolds, E.C., and Riley, P.F., 124
Resolution of ion translocating proteolipid subclasses active in bacterial calcification. Swain, L.D., *et al.*, 1094
Specific subgingival bacteria and diagnosis of gingivitis and periodontitis. Christersson, L.A., *et al.*, 1633!

BACTERIA, ANAEROBIC

Serological studies of *Peptostreptococci* using an indirect fluorescent antibody test. Collins, M.L.Z., *et al.*, 1508

BACTERIAL ADHESION

Adherence of *Streptococcus mutans* to glucans formed *in situ* in salivary pellicle. Schilling, K.M., *et al.*, 1678!
Adsorbed salivary acidic proline-rich proteins contribute to the adhesion of *Streptococcus mutans* JBP to apatitic surfaces. Gibbons, R.J. and Hay, D.I., 1303
Bacterial adhesion to oral tissues: a model for infectious diseases. Gibbons, R.J., 750
Molecular aspects of adherence of *Actinomyces viscosus* and *Actinomyces naeslundii* to oral surfaces. Cisar, J.O., *et al.*, 1558!
Relative adherence of *Bacteroides* species and strains to *Actinomyces viscosus* on saliva-coated hydroxyapatite. Li, J. and Ellen, R.P., 1308
Stability of the glucan-binding lectin of oral streptococci. Liang, L., *et al.*, 1677!

BACTERIAL PROTEINS

Bacterial adhesion to oral tissues: a model for infectious diseases. Gibbons, R.J., 750

BACTERIONEMA MATRUCHOTII

Resolution of ion translocating proteolipid subclasses active in bacterial calcification. Swain, L.D., *et al.*, 1094

BACTEROIDES

Bacterial adhesion to oral tissues: a model for infectious diseases. Gibbons, R.J., 750

Correlation between serum and gingival crevicular fluid antibodies and periodontal status. Horino, K., *et al.*, 1688!

Microbiological observations at periodic subgingival antimicrobial irrigation of periodontal pockets. Dahlén, G., *et al.*, 1714!

Relative adherence of *Bacteroides* species and strains to *Actinomyces viscosus* on saliva-coated hydroxyapatite. Li, J. and Ellen, R.P., 1308

Specific subgingival bacteria and diagnosis of gingivitis and periodontitis. Christersson, L.A., *et al.*, 1633!

BIBLIOGRAPHY

Survey of reference accuracy in five national dental journals, A. Doms, C.A., 442

BIGUANIDES

Chlorhexidine and related compounds. Gjermo, P., 1602!

BIOLOGICAL AVAILABILITY

Delivery systems for agents in supra- and subgingival plaque control. Van Der Ouderaa, F.J. and Cummins, D., 1617!

Influence of milk and food on fluoride bioavailability from NaF and Na_2FPO_3 in man. Trautner, K. and Einwag, J., 72

BITE FORCE (*see* **Dental Occlusion**)

BLOOD

Contribution of dental amalgam to mercury in blood, The. Snapp, K.R., *et al.*, 780

Effect of an acute maternal fluoride dose on fetal plasma fluoride levels and enamel fluoride uptake in guinea pigs. Bawden, J.W., *et al.*, 1169

Effect of exercise on salivary composition and cortisol in serum and saliva in man. Ben-Aryeh, H., *et al.*, 1495

Studies on fluoride concentrations in human submandibular/sublingual saliva and their relation to flow rate and plasma fluoride levels. Oliveby, A., *et al.*, 146

BLOOD PRESSURE

Arterial blood pressure regulation of pulpal blood flow as determined by Laser Doppler. Sasano, T., *et al.*, 791

BONDING, DENTAL

Adsorption of 4-methacryloxyethyl trimellitate anhydride (4-META) on hydroxyapatite and its role in composite bonding. Misra, D.N., 42

Bond strength study of luted castable ceramic restorations, A. McInnes-Ledoux, P.M., *et al.*, 823

Confocal optical microscope study of the morphology of the tooth/restoration interface using Scotchbond 2 dentin adhesive, A. Watson, T.F., 1124

Curing light-activated composite cement through porcelain. Chan, K.C. and Boyer, D.B., 476

Effect of etching glass-ionomer cements on bond strength to composite resin. Sheth, J.J., *et al.*, 1082

Increased wall-to-wall curing contraction in thin bonded resin layers. Feilzer, A.J., *et al.*, 48

Inhibition of bacterial growth under composite restorations following GLUMA pretreatment. Felton, D., *et al.*, 491

Maximum bond strength of dental luting cement to amalgam alloy. Mojon, P., *et al.*, 1545

Oligomers with pendant isocyanate groups as adhesives for dentin and other tissues. Lee, C.H. and Brauer, G.M., 484

Substitutes for N-phenylglycine in adhesive bonding to dentin. Johnston, A.D., *et al.*, 1337

BONE AND BONES

Clinical, radiographic, and histological evaluation of permucosal dental implants of dense hydroxylapatite in dogs, A. De Lange, G.L., *et al.*, 509

BONE DEVELOPMENT

Bovine tooth-derived bone morphogenetic protein. Kawai, T. and Urist, M.R., 1069

BONE MARROW TRANSPLANTATION

Oral gram-negative bacilli in bone marrow transplant patients given chlorhexidine rinses. Brown, A.T., *et al.*, 1199

BONE RESORPTION

Finite element method simulation of bone resorption beneath a complete denture. Maeda, Y. and Wood, W.W., 1370

BRUXISM

Methodological considerations concerning the use of Bruxcore Plates to evaluate nocturnal bruxism. Pierce, C.J. and Gale, E.N., 1110

BUFFERS

Interpretation of CO_2 equilibration data to obtain plaque fluid buffer capacities, and comparison with results obtained by titration, The. Dibdin, G.H. and Shellis, R.P., 1323

BULIMIA

Depth and area of dental erosions, and dental caries, in bulimic women. Jones, R.R.H. and Cleaton-Jones, P., 1275

CALCIFICATION, PHYSIOLOGIC

Resolution of ion translocating proteolipid subclasses active in bacterial calcification. Swain, L.D., *et al.*, 1094

CALCITONIN

In vitro effects of calcitonin and/or parathyroid hormone on odontogenesis of mouse embryonic molars. Sakakura, Y., *et al.*, 1279

CALCIUM PHOSPHATE

Effect of silicic acid on calcium phosphate precipitation. Damen, J.J.M. and Ten Cate, J.M., 1355

CALCULUS INDEX

National survey of caries prevalence in 6-15-year-old children in France. Cahen, P.M., *et al.*, 64

CANDIDA ALBICANS

Biochemical basis for control of plaque-related oral diseases (normal and compromised host): mucosal diseases. Shillitoe, E.J., 1597!

CARBOHYDRATES

Difference in amounts between titratable acid and total carboxylic acids produced by oral streptococci during sugar metabolism. Iwami, Y., *et al.*, 16

Effect of sugar cane chewing on the development of dental caries, The. Frencken, J.E., *et al.*, 1102

Effects of carbohydrate pulses and pH on population shifts within oral microbial communities *in vitro*. Bradshaw, D.J., *et al.*, 1298

CARBON DIOXIDE

Interpretation of CO_2 equilibration data to obtain plaque fluid buffer capacities, and comparison with results obtained by titration, The. Dibdin, G.H. and Shellis, R.P., 1323

CARBOXYLIC ACIDS

Difference in amounts between titratable acid and total carboxylic acids produced by oral streptococci during sugar metabolism. Iwami, Y., *et al.*, 16

CARDIOVASCULAR SYSTEM

Changes in plasma epinephrine concentration after dental infiltration anesthesia with different doses of epinephrine. Knoll-Köhler, E., *et al.*, 1098

CARIOGENIC DIET

Effect of sugar cane chewing on the development of dental caries, The. Frencken, J.E., *et al.*, 1102

On changing the cariogenic chemistry of coronal plaque. Tanzer, J.M., 1576!

CARIOSTATIC AGENTS

In vitro caries-inhibitory properties of a silver cermet. Swift, E.J., Jr., 1088

Potential of xylitol, mannitol, and sorbose to inhibit metabolism in *Streptococcus sobrinus* OMZ 176. Assev, S., *et al.*, 1729!

CASEINS

Concentration of dietary casein required for normal mandibular growth in the rat, The. Bozzini, C., *et al.*, 840

CELLS, CULTURED

Initial characterization of cells derived from human periodontia. Piche, J.E., *et al.*, 761

CERAMICS

Effect of visco-elastic behavior on stress development in a metal-ceramic system. DeHoff, P.H. and Anusavice, K.J., 1223

Influence of tempering and contraction mismatch on crack development in ceramic surfaces. Anusavice, K.J., *et al.*, 1182

Tempering stresses in feldspathic porcelain. DeHoff, P.H. and Anusavice, K.J., 134

CHEWING GUM

Delivery systems for agents in supra- and subgingival plaque control. Van Der Ouderaa, F.J. and Cummins, D., 1617!

Effect of daily gum-chewing on salivary flow rates in man, The. Jenkins, G.N. and Edgar, W.M., 786

Prevention of sucrose-induced demineralization of tooth enamel by chewing sorbitol gum. Kashket, S., *et al.*, 460

Remineralization of artificial caries-like lesions in human enamel *in situ* by chewing sorbitol gum. Leach, S.A., *et al.*, 1064

CHI-SQUARE TEST

Adjustment of frequently used chi-square procedures for the effect of site-to-site dependencies in the analysis of dental data. Donner, A. and Banting, D., 1350

CHILD

Cohort effects in the prevalence of caries in child populations in Tanzania. Frencken, J.E., *et al.*, 1777

Dental plaque and caries on occlusal surfaces of first permanent molars in relation to stage of eruption. Carvalho, J.C., *et al.*, 773

CHINA

Dental caries in adult and elderly Chinese. Luan, W.-M., *et al.*, 1771

Guest editorial: collaborative research between the People's Republic of China and other countries. Yu, Qin-Xi, 1470*

CHLORHEXIDINE

Chlorhexidine and related compounds. Gjermo, P., 1602!

Chlorhexidine interactions with sodium lauryl sulfate *in vivo*. Barkvoll, P., *et al.*, 1722!

Clinical effectiveness of a 0.12% chlorhexidine mouthrinse over two years. Banting, D., *et al.*, 1716!

Development and *in vitro* evaluation of an intra-oral controlled-release delivery system for chlorhexidine. Mirth, D.B., *et al.*, 1285

Effect of pH on the sensitivity of species of *Lactobacillus* to chlorhexidine and the antibiotics Minocycline and Spiramycin, The. Cleghorn, B. and Bowden, G.H., 1146

Effect of two years' use of 0.12% chlorhexidine on plaque bacteria. Briner, W., *et al.*, 1719!

Effects of sustained-release chlorhexidine acetate on the human dental plaque flora. Schaeken, M.J.M. and De Haan, P., 119

Effects of varnishes containing chlorhexidine on the human dental plaque flora. Schaeken, M.J.M., *et al.*, 1786

In vivo effects of zinc and chlorhexidine on dental plaque ureolysis and glycolysis. Giertsen, E., *et al.*, 1132

Modes of action of currently known chemical anti-plaque agents other than chlorhexidine. Scheie, A.AA., 1609!

Pharmacokinetic principles controlling efficacy of oral therapy. Goodson, J.M., 1625!

CLEFT PALATE

Conference Report: advances in craniofacial developmental biology and their clinical implications. Report on a symposium... Sperber, G.H., 1294@

COLLAGENASE

Collagenase activity in gingival crevicular fluid and inhibition by tetracyclines. Yanagimura, M., *et al.*, 1691!

COLLAGENS

Bacterial adhesion to oral tissues: a model for infectious diseases. Gibbons, R.J., 750

Characterization of one phenotype of human periodontal granulation-tissue fibroblasts. Larjava, H., *et al.*, 20

Effect of force level on synthesis of type III and type I collagen in mouse interparietal suture. Yen, E.H.K., *et al.*, 1746

Effect of sutural growth rate on collagen phenotype synthesis, The. Yen, E.H.K., *et al.*, 1058

COLOR

Assessment of appearance match by visual observation and clinical colorimetry. Johnston, W.M. and Kao, E.C., 819

Colors of mixtures of dental opaque porcelains, The. White, J.M. and O'Brien, W.J., 1319

Performance assessment of colorimetric devices on dental porcelains. Seghi, R.R., *et al.*, 1755

Visual and instrumental colorimetric assessments of small color differences on translucent dental porcelain. Seghi, R.R., *et al.*, 1760

COMPOSITES

Output from visible-light activation units and depth of cure of light-activated composites. McCabe, J.F. and Carrick, T.E., 1534

Stiffness of endodontically-treated teeth related to restoration technique. Reeh, E.S., *et al.*, 1540

COMPOSITES, RESIN

Adsorption of 4-methacryloxyethyl trimellitate anhydride (4-META) on hydroxyapatite and its role in composite bonding. Misra, D.N., 42

Assessment of appearance match by visual observation and clinical colorimetry. Johnston, W.M. and Kao, E.C., 819

Confocal optical microscope study of the morphology of the tooth/restoration interface using Scotchbond 2 dentin adhesive, A. Watson, T.F., 1124

Curing light-activated composite cement through porcelain. Chan, K.C. and Boyer, D.B., 476

Effect of etching glass-ionomer cements on bond strength to composite resin. Sheth, J.J., *et al.*, 1082

Increased wall-to-wall curing contraction in thin bonded resin layers. Feilzer, A.J., *et al.*, 48

Influence of admixing microfiller to small-particle composite resin on wear, tensile strength, hardness, and surface roughness, The. Pallav, P., *et al.*, 489

Inhibition of bacterial growth under composite restorations following GLUMA pretreatment. Felton, D., *et al.*, 491

In vitro investigation of the effects of glass inserts on the effective composite resin polymerization shrinkage, An. Donly, K.J., *et al.*, 1234

New porcelain repair system with a silane coupler, ferric chloride, and adhesive opaque resin, A. Matsumura, H., *et al.*, 813

Oligomers with pendant isocyanate groups as adhesives for dentin and other tissues. Lee, C.H. and Brauer, G.M., 484

COMPUTER SIMULATION

Analysis of factors influencing diffusion from dental plaque into a moving film of saliva and the implications for caries, An. Dawes, C., 1483

Computer model relating chemistry to biological activity of metal anti-plaque agents. Cummins, D. and Watson, G.K., 1702!

CONNECTIVE TISSUE

Characterization of one phenotype of human periodontal granulation-tissue fibroblasts. Larjava, H., *et al.*, 20

CONTROLLED-RELEASE PREPARATIONS (*see* Delayed-action Preparations)

CORROSION

Correlation of dental amalgam crevice corrosion with clinical ratings. Sutow, E.J., *et al.*, 82

CORTISOL

Effect of exercise on salivary composition and cortisol in serum and saliva in man. Ben-Aryeh, H., *et al.*, 1495

CRANIAL SUTURES

Effect of force level on synthesis of type III

and type I collagen in mouse interparietal suture. Yen, E.H.K., *et al.*, 1746
Effect of sutural growth rate on collagen phenotype synthesis, The. Yen, E.H.K., *et al.*, 1058

CROWNS

Maximum bond strength of dental luting cement to amalgam alloy. Mojon, P., *et al.*, 1545

CRYSTALLOGRAPHY

Microscopic and crystallographic examinations of the teeth of the X-linked hypophosphatemic mouse. Abe, K., *et al.*, 1519

CYSTATINS

Tissue distribution of RNAs for cystatins, histatins, statherin, and proline-rich salivary proteins in humans and macaques. Sabatini, L.M., *et al.*, 1138

CYTOMEGALOVIRUSES

Biochemical basis for control of plaque-related oral diseases (normal and compromised host): mucosal diseases. Shillitoe, E.J., 1597!

DATA INTERPRETATION, STATISTICAL

Adjustment of frequently used chi-square procedures for the effect of site-to-site dependencies in the analysis of dental data. Donner, A. and Banting, D., 1350

DDE INDEX

Modified DDE index for use in epidemiological studies of enamel defects, Clarkson, J. and O'Mullane, D., 445

DELAYED-ACTION PREPARATIONS

Delivery systems for agents in supra- and subgingival plaque control. Van Der Ouderaa, F.J. and Cummins, D., 1617!
Development and *in vitro* evaluation of an intra-oral controlled-release delivery system for chlorhexidine. Mirth, D.B., *et al.*, 1285
Pharmacokinetic principles controlling efficacy of oral therapy. Goodson, J.M., 1625!

DELIVERY OF DRUGS (*see* Drug Administration Routes)

DEMOGRAPHY

Guest editorial: a look at the future of American dentistry. Saddoris, J.A., 519*

DENTAL ALLOYS

Amalgam margin breakdown caused by creep fatigue rupture. Williams, P.T. and Cahoon, J.R., 1188
Dental casting of titanium and Ni-Ti alloys by new casting machine. Hamanaka, H., *et al.*, 1529
Effect of thermal history on porcelain expansion behavior, The. Fairhurst, C.W., *et al.*, 1313
Effect of visco-elastic behavior on stress development in a metal-ceramic system. DeHoff, P.H. and Anusavice, K.J., 1223
Maximum bond strength of dental luting cement to amalgam alloy. Mojon, P., *et al.*, 1545

DENTAL AMALGAM

Amalgam margin breakdown caused by creep fatigue rupture. Williams, P.T. and Cahoon, J.R., 1188
Contribution of dental amalgam to mercury in blood, The. Snapp, K.R., *et al.*, 780
Correlation of dental amalgam crevice corrosion with clinical ratings. Sutow, E.J., *et al.*, 82
Effect of admixed indium on mercury vapor release from dental amalgam. Powell, L.V., 1231
Maximum bond strength of dental luting cement to amalgam alloy. Mojon, P., *et al.*, 1545
Model of mercury vapor transport from amalgam restorations in the oral cavity. Olsson, S., *et al.*, 504
Stiffness of endodontically-treated teeth related to restoration technique. Reeh, E.S., *et al.*, 1540

DENTAL CALCULUS

Effect of silicic acid on calcium phosphate precipitation. Damen, J.J.M. and Ten Cate, J.M., 1355

DENTAL CARIES

Analysis of factors influencing diffusion from dental plaque into a moving film of saliva and the implications for caries, An. Dawes, C., 1483
Cohort effects in the prevalence of caries in child populations in Tanzania. Frencken, J.E., *et al.*, 1777
Criteria for efficacy of plaque control agents for caries. Stephen, K.W., 1672!
Dental caries in adult and elderly Chinese. Luan, W.-M., *et al.*, 1771
Dental plaque and caries on occlusal surfaces of first permanent molars in relation to stage of eruption. Carvalho, J.C., *et al.*, 773
Depth and area of dental erosions, and dental caries, in bulimic women. Jones, R.R.H. and Cleaton-Jones, P., 1275
Detection of incipient caries with tracer dyes, The. O'Brien, W.J., *et al.*, 157
Difference in amounts between titratable acid and total carboxylic acids produced by oral streptococci during sugar metabolism. Iwami, Y., *et al.*, 16
Effect of chronic atropine treatment on salivary composition and caries in rats, The. Watson, G.E., *et al.*, 1739
Effect of sugar cane chewing on the development of dental caries, The. Frencken, J.E., *et al.*, 1102
Effects of airborne fluorides on oral conditions in Morocco, The. Haikel, Y., *et al.*, 1238
Effects of sustained-release chlorhexidine acetate on the human dental plaque flora. Schaeken, M.J.M. and De Haan, P., 119
Guest editorial: mechanical *vs.* disease-oriented treatment of dental caries: educational aspects. Thylstrup, A., 1135*
Microbiological study of early caries of approximal surfaces in schoolchildren, A. Marsh, P.D., *et al.*, 1151
Microstructural features of carious enamel imaged with back-scattered electrons. Pearce, E.I.F. and Nelson, D.G.A., 113
National survey of caries prevalence in 6-15-year-old children in France. Cahen, P.M., *et al.*, 64
On changing the cariogenic chemistry of coronal plaque. Tanzer, J.M., 1576!
Prevalence of and factors associated with root decay in older adults in Canada. Locker, D., *et al.*, 768
Remineralization of artificial caries-like lesions in human enamel *in situ* by chewing sorbitol gum. Leach, S.A., *et al.*, 1064
Studies on sound and carious enamel with the quantitative acoustic microscope. Peck, S.D., *et al.*, 107
Surface tension and contact angle on enamel of surfactant solutions for caries diagnosis with dyes. Van De Rijke, J.W., *et al.*, 1205

DENTAL CASTING TECHNIC

Dental casting of titanium and Ni-Ti alloys by new casting machine. Hamanaka, H., *et al.*, 1529

DENTAL CEMENTS

Bond strength study of luted castable ceramic restorations, A. McInnes-Ledoux, P.M., *et al.*, 823
Curing light-activated composite cement through porcelain. Chan, K.C. and Boyer, D.B., 476
Effect of etching glass-ionomer cements on bond strength to composite resin. Sheth, J.J., *et al.*, 1082
Maximum bond strength of dental luting cement to amalgam alloy. Mojon, P., *et al.*, 1545

DENTAL CEMENTUM

Bovine tooth-derived bone morphogenetic protein. Kawai, T. and Urist, M.R., 1069

DENTAL ENAMEL

Alteration of enamel proteins in hypomaturation amelogenesis imperfecta. Wright, J.T. and Butler, W.T., 1328
Bovine tooth-derived bone morphogenetic protein. Kawai, T. and Urist, M.R., 1069
Comparison of fluoride uptake produced by tray and flossing methods *in vitro*. Guo, M.K., *et al.*, 496
Effects of pellicle formation on streptococcal adhesion to human enamel and artificial substrata with various surface free-energies, The. Pratt-Terpstra, I.H., *et al.*, 463
Electron probe micro-analysis for subsurface demineralization and remineralization of dental enamel. Chu, J.S., *et al.*, 26
Fluoride incorporation into and retention in

remineralized enamel. Iijima, Y. and Koulourides, T., 1289
In vitro effects of calcitonin and/or parathyroid hormone on odontogenesis of mouse embryonic molars. Sakakura, Y., *et al.*, 1279
Influence of surface free-energy on planimetric plaque growth in man, The. Quirynen, M., *et al.*, 796
Iron concentration in teeth of tetra-odontiform fishes and its phylogenetic significance. Suga, S., *et al.*, 1115
Microflora associated with the development of initial enamel decalcification below orthodontic bands *in vivo* in children living in a fluoridated-water area, The. Boyar, R.M., *et al.*, 1734
Microstructural features of carious enamel imaged with back-scattered electrons. Pearce, E.I.F. and Nelson, D.G.A., 113
Modified DDE index for use in epidemiological studies of enamel defects, Clarkson, J. and O'Mullane, D., 445
Possible function of matrix proteins in fluoride incorporation into enamel mineral during porcine amelogenesis. Aoba, T., *et al.*, 1162
Possible roles of partial sequences at N- and C-termini of amelogenin in protein-enamel mineral interaction. Aoba, T., *et al.*, 1331
Prevention of sucrose-induced demineralization of tooth enamel by chewing sorbitol gum. Kashket, S., *et al.*, 460
Quantitative *in vivo* wear of human enamel. Lambrechts, P., *et al.*, 1752
Quantitative study of fluoride transport during subsurface dissolution of dental enamel. Chu, J.S., *et al.*, 32
Remineralization of artificial caries-like lesions in human enamel *in situ* by chewing sorbitol gum. Leach, S.A., *et al.*, 1064
Studies on sound and carious enamel with the quantitative acoustic microscope. Peck, S.D., *et al.*, 107
Surface tension and contact angle on enamel of surfactant solutions for caries diagnosis with dyes. Van De Rijke, J.W., *et al.*, 1205

DENTAL FLOSS

Delivery systems for agents in supra- and subgingival plaque control. Van Der Ouderaa, F.J. and Cummins, D., 1617!

DENTAL FOLLICLE

Changes in the tartrate-resistant acid phosphatase cell population in dental follicles and bony crypts of rat molars during tooth eruption. Wise, G.E. and Fan, W., 150

DENTAL HEALTH SERVICES

Guest editorial: geriatric dentistry: a pressing need. Massler, M., 1550*

DENTAL HEALTH SURVEYS

Cohort effects in the prevalence of caries in child populations in Tanzania. Frencken, J.E., *et al.*, 1777
Dental caries in adult and elderly Chinese. Luan, W.-M., *et al.*, 1771
Effects of airborne fluorides on oral conditions in Morocco, The. Haikel, Y., *et al.*, 1238
Modified DDE index for use in epidemiological studies of enamel defects, Clarkson, J. and O'Mullane, D., 445
National survey of caries prevalence in 6-15-year-old children in France. Cahen, P.M., *et al.*, 64
Prevalence of and factors associated with root decay in older adults in Canada. Locker, D., *et al.*, 768

DENTAL IMPLANTATION

Clinical, radiographic, and histological evaluation of permucosal dental implants of dense hydroxylapatite in dogs, A. De Lange, G.L., *et al.*, 509

DENTAL IMPRESSION MATERIALS

Rheological properties of elastomers during setting. McCabe, J.F. and Carrick, T.E., 1218

DENTAL MATERIALS

Guest editorial: a polemic on behalf of a poor cousin. Darvell, B.W., 843*
Guest editorial: dental materials: a glance back... but a hard look into the future. Kusy, R.P., 1374*
Modified model cavity method for assessing antibacterial properties of dental restorative materials, The. Meryon, S.D. and Johnson, S.G., 835

DENTAL OCCLUSION

Dental plaque and caries on occlusal surfaces of first permanent molars in relation to stage of eruption. Carvalho, J.C., *et al.*, 773
Finite element method simulation of bone resorption beneath a complete denture. Maeda, Y. and Wood, W.W., 1370
Quantitative *in vivo* wear of human enamel. Lambrechts, P., *et al.*, 1752
Relationships between the size, position, and angulation of human jaw muscles and unilateral first molar bite force. Sasaki, K., *et al.*, 499
Three-dimensional evaluation of the effects of functional occlusal forces on the morphology of dental and periodontal tissues of the rat incisor, A. Steigman, S., *et al.*, 1269

DENTAL PLAQUE

Analysis of factors influencing diffusion from dental plaque into a moving film of saliva and the implications for caries, An. Dawes, C., 1483
Bacterial adhesion to oral tissues: a model for infectious diseases. Gibbons, R.J., 750
Biochemical basis for control of plaque-related oral diseases in the normal and compromised host: periodontal diseases. Van Dyke, T.E. and Zinney, W.B., 1588!
Biochemical basis for control of plaque-related oral diseases (normal and compromised host): mucosal diseases. Shillitoe, E.J., 1597!
Chemical plaque control: what *in vitro* and animal test systems are appropriate? Guggenheim, B. and Schmid, R., 1645!
Chlorhexidine and related compounds. Gjermo, P., 1602!
Chlorhexidine interactions with sodium lauryl sulfate *in vivo*. Barkvoll, P., *et al.*, 1722!
Clinical effectiveness of a 0.12% chlorhexidine mouthrinse over two years. Banting, D., *et al.*, 1716!
Computer model relating chemistry to biological activity of metal anti-plaque agents. Cummins, D. and Watson, G.K., 1702!
Criteria for efficacy of plaque control agents for caries. Stephen, K.W., 1672!
Criteria for efficacy of plaque control agents for periodontal disease: microbiology. Ranney, R.R., 1655!
Delivery of zinc and triclosan to micro-reservoirs of antibacterial activity. Gilbert, R.J., *et al.*, 1706!
Delivery systems for agents in supra- and subgingival plaque control. Van Der Ouderaa, F.J. and Cummins, D., 1617!
Dental plaque and caries on occlusal surfaces of first permanent molars in relation to stage of eruption. Carvalho, J.C., *et al.*, 773
Difference in amounts between titratable acid and total carboxylic acids produced by oral streptococci during sugar metabolism. Iwami, Y., *et al.*, 16
Effect of a zinc citrate dentifrice on calculus formation, The. Gaare, D., 1710!
Effect of pH on the sensitivity of species of *Lactobacillus* to chlorhexidine and the antibiotics Minocycline and Spiramycin, The. Cleghorn, B. and Bowden, G.H., 1146
Effect of SnF_2 on gingivitis and periodontopathic micro-organisms. Tinanoff, N., *et al.*, 1727!
Effect of two years' use of 0.12% chlorhexidine on plaque bacteria. Briner, W., *et al.*, 1719!
Effects of sustained-release chlorhexidine acetate on the human dental plaque flora. Schaeken, M.J.M. and De Haan, P., 119
Effects of varnishes containing chlorhexidine on the human dental plaque flora. Schaeken, M.J.M., *et al.*, 1786
Estimation of the velocity of the salivary film at some different locations in the mouth. Dawes, C., *et al.*, 1479
Fluoride in plaque following use of dentifrices containing sodium monofluorophosphate. Duckworth, R.M., *et al.*, 130
Host defenses and microbial homeostasis: role of microbial interactions. Marsh, P.D., 1567!
In vivo effects of zinc and chlorhexidine on dental plaque ureolysis and glycolysis. Giertsen, E., *et al.*, 1132
Increased pH-lowering ability of *streptococcus mutans* cell masses associated with extracellular glucan-rich matrix material and the mechanisms involved. Van Houte, J., *et al.*, 45!
Influence of surface free-energy on planimetric plaque growth in man, The. Quirynen, M., *et al.*, 796
Inhibition of plaque formation, prevention and treatment of gingivitis with sulfadiazines in beagles. Howell, T.H., *et al.*, 1712!
Interpretation of CO_2 equilibration data to obtain plaque fluid buffer capacities, and com-

parison with results obtained by titration, The. Dibdin, G.H. and Shellis, R.P., 1323
Maintenance of gingival health by a dentifrice containing zinc citrate and triclosan. Saxton, C.A., 1724!
Microbiological study of early caries of approximal surfaces in schoolchildren, A. Marsh, P.D., *et al.*, 1151
Microflora associated with the development of initial enamel decalcification below orthodontic bands *in vivo* in children living in a fluoridated-water area, The. Boyar, R.M., *et al.*, 1734
Modes of action of currently known chemical anti-plaque agents other than chlorhexidine. Scheie, A.AA., 1609!
Molecular aspects of adherence of *Actinomyces viscosus* and *Actinomyces naeslundii* to oral surfaces. Cisar, J.O., *et al.*, 1558!
N-Acetylcysteine, a mucolytic agent as a plaque inhibitor. Bowles, W.H., 1698!
Non-antibacterial approach to prevent plaque formation, A. Giertsen, E., *et al.*, 1683!
On changing the cariogenic chemistry of coronal plaque. Tanzer, J.M., 1576!
Oral delivery of zinc from slurries and separated supernatant fractions of dentifrices. Tan-Walker, R.L.B. and Gilbert, R.J., 1708!
Physiology of fluoride inhibition of oral bacteria. Marquis, R.E., 1694!
Potential of xylitol, mannitol, and sorbose to inhibit metabolism in *Streptococcus sobrinus* OMZ 176. Assev, S., *et al.*, 1729!
Protein dissimilation by human salivary-sediment bacteria. Reynolds, E.C., and Riley, P.F., 124
Relative adherence of *Bacteroides* species and strains to *Actinomyces viscosus* on saliva-coated hydroxyapatite. Li, J. and Ellen, R.P., 1308
Review of the guidelines for acceptance of chemotherapeutic products for the control of supragingival dental plaque and gingivitis. Page, R.C., 1640!
Roles of saliva (pellicle), diet, and nutrition on plaque formation. Tabak, L.A. and Bowen, W.H., 1560!
Stability of SnF_2-induced root-surface deposits *in vivo*, The. Ellingsen, J.E. and Rølla,G.,1700!

DENTAL PLAQUE INDEX

National survey of caries prevalence in 6-15-year-old children in France. Cahen, P.M., *et al.*, 64

DENTAL PORCELAINS

Colors of mixtures of dental opaque porcelains, The. White, J.M. and O'Brien, W.J., 1319
Curing light-activated composite cement through porcelain. Chan, K.C. and Boyer, D.B., 476
Effect of firing temperature and water exposure on crack propagation in unglazed porcelain. Anusavice, K.J. and Lee, R.B., 1075
Effect of thermal history on porcelain expansion behavior, The. Fairhurst, C.W., *et al.*, 1313
Effect of visco-elastic behavior on stress development in a metal-ceramic system. DeHoff, P.H. and Anusavice, K.J., 1223
Influence of tempering and contraction mismatch on crack development in ceramic surfaces. Anusavice, K.J., *et al.*, 1182
New porcelain repair system with a silane coupler, ferric chloride, and adhesive opaque resin, A. Matsumura, H., *et al.*, 813
Performance assessment of colorimetric devices on dental porcelains. Seghi, R.R., *et al.*, 1755
Rapid heating and cooling rate dilatometer for measuring thermal expansion in dental porcelain, A. Twiggs, S.W., *et al.*, 1316
Tempering stresses in feldspathic porcelain. DeHoff, P.H. and Anusavice, K.J., 134
Visual and instrumental colorimetric assessments of small color differences on translucent dental porcelain. Seghi, R.R., *et al.*, 1760

DENTAL PULP

Arterial blood pressure regulation of pulpal blood flow as determined by Laser Doppler. Sasano, T., *et al.*, 791
Demonstration of physiological barrier between pulpal odontoblasts and its perturbation following routine restorative procedures: a horseradish peroxidase tracing study in the rat. Turner, D.F., *et al.*, 1262

DENTAL RESTORATION

Assessment of appearance match by visual observation and clinical colorimetry. Johnston, W.M. and Kao, E.C., 819
Bond strength study of luted castable ceramic restorations, A. McInnes-Ledoux, P.M., *et al.*, 823
In vitro caries-inhibitory properties of a silver cermet. Swift, E.J., Jr., 1088
Modified model cavity method for assessing antibacterial properties of dental restorative materials, The. Meryon, S.D. and Johnson, S.G., 835
Performance assessment of colorimetric devices on dental porcelains. Seghi, R.R., *et al.*, 1755
Stiffness of endodontically-treated teeth related to restoration technique. Reeh, E.S., *et al.*, 1540

DENTAL STRESS ANALYSIS

Tempering stresses in feldspathic porcelain. DeHoff, P.H. and Anusavice, K.J., 134

DENTIFRICES

Delivery of zinc and triclosan to micro-reservoirs of antibacterial activity. Gilbert, R.J., *et al.*, 1706!
Delivery systems for agents in supra- and subgingival plaque control. Van Der Ouderaa, F.J. and Cummins, D., 1617!
Effect of a zinc citrate dentifrice on calculus formation, The. Gaare, D., 1710!
Fluoride in plaque following use of dentifrices containing sodium monofluorophosphate. Duckworth, R.M., *et al.*, 130
Maintenance of gingival health by a dentifrice containing zinc citrate and triclosan. Saxton, C.A., 1724!
Oral delivery of zinc from slurries and separated supernatant fractions of dentifrices. Tan-Walker, R.L.B. and Gilbert, R.J., 1708!

DENTIN

Bovine tooth-derived bone morphogenetic protein. Kawai, T. and Urist, M.R., 1069
Confocal optical microscope study of the morphology of the tooth/restoration interface using Scotchbond 2 dentin adhesive, A. Watson, T.F., 1124
Demonstration of physiological barrier between pulpal odontoblasts and its perturbation following routine restorative procedures: a horseradish peroxidase tracing study in the rat. Turner, D.F., *et al.*, 1262
In vitro effects of calcitonin and/or parathyroid hormone on odontogenesis of mouse embryonic molars. Sakakura, Y., *et al.*, 1279
Inhibition of bacterial growth under composite restorations following GLUMA pretreatment. Felton, D., *et al.*, 491
Oligomers with pendant isocyanate groups as adhesives for dentin and other tissues. Lee, C.H. and Brauer, G.M., 484
Scanning electron microscopic characterization of sensitive *vs.* insensitive human radicular dentin. Yoshiyama, M., *et al.*, 1498
Substitutes for N-phenylglycine in adhesive bonding to dentin. Johnston, A.D., *et al.*, 1337

DENTISTRY

Guest editorial: a look at the future of American dentistry. Saddoris, J.A., 519*
Guest editorial: a polemic on behalf of a poor cousin. Darvell, B.W., 843*
Guest editorial: is scientific judgment by a dentist the ultimate indignity? Aleo, J.J., 744*
Guest editorial: mechanical *vs.* disease-oriented treatment of dental caries: educational aspects. Thylstrup, A., 1135*

DENTISTS

Guest editorial: is scientific judgment by a dentist the ultimate indignity? Aleo, J.J., 744*

DENTURE, COMPLETE

Finite element method simulation of bone resorption beneath a complete denture. Maeda, Y. and Wood, W.W., 1370

DENTURE REBASING

Finite element method simulation of bone resorption beneath a complete denture. Maeda, Y. and Wood, W.W., 1370

DEXAMETHASONE

Effects of thyroxine and dexamethasone on rat submandibular glands. Sagulin, G.-B. and Roomans, G.M., 1247

DIABETES MELLITUS

Role of parotid amylase in starch digestion in the gastro-intestinal tracts of diabetic rats. Kurahashi, M. and Inomata, K., 1366

DIAGNOSIS, ORAL

Clinical *vs.* arthrographic diagnosis of TMJ internal derangement. Anderson, G.C., *et al.*, 826

Efficacy of panoramic radiography in dental diagnosis and treatment planning. Kantor, M.L. and Slome, B.A., 810

DICOR

Bond strength study of luted castable ceramic restorations, A. McInnes-Ledoux, P.M., *et al.*, 823

DIET

Concentration of dietary casein required for normal mandibular growth in the rat, The. Bozzini, C., *et al.*, 840

Differences in the rate of molar wear between monkeys raised on different diets. Teaford, M.F. and Oyen, O.J., 1513

On changing the cariogenic chemistry of coronal plaque. Tanzer, J.M., 1576!

Roles of saliva (pellicle), diet, and nutrition on plaque formation. Tabak, L.A. and Bowen, W.H., 1560!

DIGESTION

Role of parotid amylase in starch digestion in the gastro-intestinal tracts of diabetic rats. Kurahashi, M. and Inomata, K., 1366

DILATOMETER

Rapid heating and cooling rate dilatometer for measuring thermal expansion in dental porcelain, A. Twiggs, S.W., *et al.*, 1316

DMF INDEX

National survey of caries prevalence in 6-15-year-old children in France. Cahen, P.M., *et al.*, 64

DNA RESTRICTION ENZYMES

Investigation into the use of restriction endonuclease analysis for the study of transmission of mutans streptococci, An. Kulkarni, G.V., *et al.*, 1155

DOGS

Arterial blood pressure regulation of pulpal blood flow as determined by Laser Doppler. Sasano, T., *et al.*, 791

Clinical, radiographic, and histological evaluation of permucosal dental implants of dense hydroxylapatite in dogs, A. De Lange, G.L., *et al.*, 509

Maxillary arch dimensions after palatal surgery at different ages on beagle dogs. Wijdeveld, M.G.M.M., *et al.*, 1105

DRUG ADMINISTRATION ROUTES

Delivery of zinc and triclosan to micro-reservoirs of antibacterial activity. Gilbert, R.J., *et al.*, 1706!

Delivery systems for agents in supra- and subgingival plaque control. Van Der Ouderaa, F.J. and Cummins, D., 1617!

Development and *in vitro* evaluation of an intra-oral controlled-release delivery system for chlorhexidine. Mirth, D.B., *et al.*, 1285

Pharmacokinetic principles controlling efficacy of oral therapy. Goodson, J.M., 1625!

DRUG EVALUATION

Chemical plaque control: what *in vitro* and animal test systems are appropriate? Guggenheim, B. and Schmid, R., 1645!

DRUG SENSITIVITY ASSAY, MICROBIAL (*see* Microbial Sensitivity Tests)

DYES

Detection of incipient caries with tracer dyes, The. O'Brien, W.J., *et al.*, 157

Surface tension and contact angle on enamel of surfactant solutions for caries diagnosis with dyes. Van De Rijke, J.W., *et al.*, 1205

EDUCATION, DENTAL

Guest editorial: mechanical *vs.* disease-oriented treatment of dental caries: educational aspects. Thylstrup, A., 1135*

Guest editorial: the development of dental research in Taiwan. Shiau, Y.-Y., 1214*

ELASTOMERS, SILICONE (*see* Silicone Elastomers)

ELECTROMYOGRAPHY

EMG power spectrum patterns of anterior temporal and masseter muscles in children and adults. Yuen, S.W.H., *et al.*, 800

ELECTRON PROBE MICROANALYSIS

Electron probe micro-analysis for subsurface demineralization and remineralization of dental enamel. Chu, J.S., *et al.*, 26

Quantitative study of fluoride transport during subsurface dissolution of dental enamel. Chu, J.S., *et al.*, 32

ENAMEL ORGAN

Biophysical analyses of sequential bands of enamel related to ruffle-ended and smooth-ended maturation ameloblasts. McKee, M.D., *et al.*, 101

Changes in the tartrate-resistant acid phosphatase cell population in dental follicles and bony crypts of rat molars during tooth eruption. Wise, G.E. and Fan, W., 150

Scanning electron microscopy of monkey secretory- and transitional-stage enamel organ cells. Skobe, Z., *et al.*, 1173

ENDODONTICS

Stiffness of endodontically-treated teeth related to restoration technique. Reeh, E.S., *et al.*, 1540

ENZYMES

Modes of action of currently known chemical anti-plaque agents other than chlorhexidine. Scheie, A.AA., 1609!

EPIDEMIOLOGY

Modified DDE index for use in epidemiological studies of enamel defects, Clarkson, J. and O'Mullane, D., 445

EPINEPHRINE

Changes in plasma epinephrine concentration after dental infiltration anesthesia with different doses of epinephrine. Knoll-Köhler, E., *et al.*, 1098

EPITHELIUM

Cytochemical study of horseradish peroxidase uptake in rat junctional epithelium. Ayasaka, N. and Tanaka, T., 1503

EPSTEIN-BARR VIRUS

Biochemical basis for control of plaque-related oral diseases (normal and compromised host): mucosal diseases. Shillitoe, E.J., 1597!

EXERCISE

Effect of exercise on salivary composition and cortisol in serum and saliva in man. Ben-Aryeh, H., *et al.*, 1495

FACIAL BONES

Conference Report: advances in craniofacial developmental biology and their clinical implications. Report on a symposium... Sperber, G.H., 1294@

Relationship between jaw muscle volume and craniofacial form. Gionhaku, N. and Lowe, A.A., 805

FATIGUE

Effect of firing temperature and water exposure on crack propagation in unglazed porcelain. Anusavice, K.J. and Lee, R.B., 1075

FERRIC COMPOUNDS

New porcelain repair system with a silane coupler, ferric chloride, and adhesive opaque resin, A. Matsumura, H., *et al.*, 813

FETUS

Effect of an acute maternal fluoride dose on fetal plasma fluoride levels and enamel fluoride uptake in guinea pigs. Bawden, J.W., *et al.*, 1169

FIBROBLASTS

Characterization of one phenotype of human periodontal granulation-tissue fibroblasts. Larjava, H., *et al.*, 20

Fibroblastic subpopulations in uninjured and wounded rabbit oral mucosa. Bronson, R.E., *et al.*, 51

FISHES

Iron concentration in teeth of tetra-odontiform fishes and its phylogenetic significance. Suga, S., *et al.*, 1115

FLUORESCENT ANTIBODY TECHNIC

Serological studies of *Peptostreptococci* using an indirect fluorescent antibody test. Collins, M.L.Z., *et al.*, 1508

FLUORIDES

Comparison of fluoride uptake produced by tray and flossing methods *in vitro*. Guo, M.K., *et al.*, 496

Conference Report: a joint IADR/ORCA International Symposium—"Fluorides: Mechanisms of Action and Recommendations for Use," March 21-24, 1989. Evans, W., 1215@

Effect of an acute maternal fluoride dose on fetal plasma fluoride levels and enamel fluoride uptake in guinea pigs. Bawden, J.W., *et al.*, 1169

Effect of SnF_2 on gingivitis and periodontopathic micro-organisms. Tinanoff, N., *et al.*, 1727!

Effects of airborne fluorides on oral conditions in Morocco, The. Haikel, Y., *et al.*, 1238

Electron probe micro-analysis for subsurface demineralization and remineralization of dental enamel. Chu, J.S., *et al.*, 26

Fluoride in plaque following use of dentifrices containing sodium monofluorophosphate. Duckworth, R.M., *et al.*, 130

Fluoride incorporation into and retention in remineralized enamel. Iijima, Y. and Koulourides, T., 1289

Genotoxic evaluation of chronic fluoride exposure: micronucleus and sperm morphology studies. Dunipace, A.J., *et al.*, 1525

In vitro caries-inhibitory properties of a silver cer.net. Swift, E.J., Jr., 1088

Influence of milk and food on fluoride bioavailability from NaF and Na_2FPO_3 in man. Trautner, K. and Einwag, J., 72

Microflora associated with the development of initial enamel decalcification below orthodontic bands *in vivo* in children living in a fluoridated-water area, The. Boyar, R.M., *et al.*, 1734

Modes of action of currently known chemical anti-plaque agents other than chlorhexidine. Scheie, A.AA., 1609!

Modified model cavity method for assessing antibacterial properties of dental restorative materials, The. Meryon, S.D. and Johnson, S.G., 835

Physiology of fluoride inhibition of oral bacteria. Marquis, R.E., 1694!

Possible function of matrix proteins in fluoride incorporation into enamel mineral during porcine amelogenesis. Aoba, T., *et al.*, 1162

Quantitative study of fluoride transport during subsurface dissolution of dental enamel. Chu, J.S., *et al.*, 32

Stability of SnF_2-induced root-surface deposits *in vivo*, The. Ellingsen, J.E. and Rølla,G.,1700!

Studies on fluoride concentrations in human submandibular/sublingual saliva and their relation to flow rate and plasma fluoride levels. Oliveby, A., *et al.*, 146

FLUOROSIS, DENTAL (*see* Mottled Enamel)

FOOD

Influence of milk and food on fluoride bioavailability from NaF and Na_2FPO_3 in man. Trautner, K. and Einwag, J., 72

FRACTURES

Amalgam margin breakdown caused by creep fatigue rupture. Williams, P.T. and Cahoon, J.R., 1188

Effect of firing temperature and water exposure on crack propagation in unglazed porcelain. Anusavice, K.J. and Lee, R.B., 1075

Fractography of a bis-GMA resin. Davis, D.M. and Waters, N.E., 1194

Influence of tempering and contraction mismatch on crack development in ceramic surfaces. Anusavice, K.J., *et al.*, 1182

FRANCE

National survey of caries prevalence in 6-15-year-old children in France. Cahen, P.M., *et al.*, 64

GALACTOSE

Molecular aspects of adherence of *Actinomyces viscosus* and *Actinomyces naeslundii* to oral surfaces. Cisar, J.O., *et al.*, 1558!

GANGLIA

Establishment of latent ganglionic infection with herpes simplex virus *via* maxillary gingiva and viral re-activation *in vivo* after trauma. Shimizu, F., *et al.*, 472

GELS

Delivery systems for agents in supra- and subgingival plaque control. Van Der Ouderaa, F.J. and Cummins, D., 1617!

GENETIC TOXICITY TESTS (*see* Mutagenicity Tests)

GENETICS, MEDICAL

Genetics of human salivary proteins. Minaguchi, K., *et al.*, 2

GERIATRIC HEALTH SERVICES

Guest editorial: geriatric dentistry: a pressing need. Massler, M., 1550*

GINGIVA

Establishment of latent ganglionic infection with herpes simplex virus *via* maxillary gingiva and viral re-activation *in vivo* after trauma. Shimizu, F., *et al.*, 472

Initial characterization of cells derived from human periodontia. Piche, J.E., *et al.*, 761

Maintenance of gingival health by a dentifrice containing zinc citrate and triclosan. Saxton, C.A., 1724!

GINGIVAL CREVICULAR FLUID

Collagenase activity in gingival crevicular fluid and inhibition by tetracyclines. Yanagimura, M., *et al.*, 1691!

Correlation between serum and gingival crevicular fluid antibodies and periodontal status. Horino, K., *et al.*, 1688!

GINGIVITIS

Clinical effectiveness of a 0.12% chlorhexidine mouthrinse over two years. Banting, D., *et al.*, 1716!

Criteria for efficacy of plaque control agents for periodontal disease: microbiology. Ranney, R.R., 1655!

Design of trials to test the efficacy of plaque control agents for periodontal diseases in humans, The. Robertson, P.B., *et al.*, 1667!

Effect of SnF_2 on gingivitis and periodontopathic micro-organisms. Tinanoff, N., *et al.*, 1727!

Inhibition of plaque formation, prevention and treatment of gingivitis with sulfadiazines in beagles. Howell, T.H., *et al.*, 1712!

Review of the guidelines for acceptance of chemotherapeutic products for the control of supragingival dental plaque and gingivitis. Page, R.C., 1640!

Specific subgingival bacteria and diagnosis of gingivitis and periodontitis. Christersson, L.A., *et al.*, 1633!

GLASS IONOMER CEMENTS

Bond strength study of luted castable ceramic restorations, A. McInnes-Ledoux, P.M., *et al.*, 823

Effect of etching glass-ionomer cements on bond strength to composite resin. Sheth, J.J., *et al.*, 1082

In vitro caries-inhibitory properties of a silver cermet. Swift, E.J., Jr., 1088

Influence of polyacid molecular weight on some properties of glass-ionomer cements, The. Wilson, A.D., *et al.*, 89

GLUCANS

Adherence of *Streptococcus mutans* to glucans formed *in situ* in salivary pellicle. Schilling, K.M., *et al.*, 1678!

Increased pH-lowering ability of *streptococcus mutans* cell masses associated with extracellular glucan-rich matrix material and the mechanisms involved. Van Houte, J., *et al.*, 451

Stability of the glucan-binding lectin of oral streptococci. Liang, L., *et al.*, 1677!

GLUCOSE

Effects of carbohydrate pulses and pH on population shifts within oral microbial communities *in vitro*. Bradshaw, D.J., *et al.*, 1298

GLUCOSYLTRANSFERASE

Cloning and expression of glycosyltransferase

activities from *Streptococcus salivarius*. Pitty, L.J., *et al.*, 1681!

GLUTARALDEHYDE

Inhibition of bacterial growth under composite restorations following GLUMA pretreatment. Felton, D., *et al.*, 491

GLYCOLYSIS

In vivo effects of zinc and chlorhexidine on dental plaque ureolysis and glycolysis. Giertsen, E., *et al.*, 1132

GLYCOSAMINOGLYCANS

Fibroblastic subpopulations in uninjured and wounded rabbit oral mucosa. Bronson, R.E., *et al.*, 51

GRAM-NEGATIVE BACTERIA

Oral gram-negative bacilli in bone marrow transplant patients given chlorhexidine rinses. Brown, A.T., *et al.*, 1199

GRANULATION TISSUE

Characterization of one phenotype of human periodontal granulation-tissue fibroblasts. Larjava, H., *et al.*, 20

GUINEA PIGS

Effect of an acute maternal fluoride dose on fetal plasma fluoride levels and enamel fluoride uptake in guinea pigs. Bawden, J.W., *et al.*, 1169

HARDNESS

Influence of admixing microfiller to small-particle composite resin on wear, tensile strength, hardness, and surface roughness, The. Pallav, P., *et al.*, 489

HEAD

Modeling of jaw-head-neck dynamics during whiplash. Schneider, K., *et al.*, 1360

HELPER CELLS

T helper and T suppressor cell reversal during the development of induced rat periapical lesions. Stashenko, P. and Yu, S.M., 830

HERPES SIMPLEX

Biochemical basis for control of plaque-related oral diseases (normal and compromised host): mucosal diseases. Shillitoe, E.J., 1597!

Establishment of latent ganglionic infection with herpes simplex virus *via* maxillary gingiva and viral re-activation *in vivo* after trauma. Shimizu, F., *et al.*, 472

HISTATINS

Tissue distribution of RNAs for cystatins, histatins, statherin, and proline-rich salivary proteins in humans and macaques. Sabatini, L.M., *et al.*, 1138

HOMEOSTASIS

Host defenses and microbial homeostasis: role of microbial interactions. Marsh, P.D., 1567!

HORSERADISH PEROXIDASE

Cytochemical study of horseradish peroxidase uptake in rat junctional epithelium. Ayasaka, N. and Tanaka, T., 1503

Demonstration of physiological barrier between pulpal odontoblasts and its perturbation following routine restorative procedures: a horseradish peroxidase tracing study in the rat. Turner, D.F., *et al.*, 1262

HOST-PARASITE RELATIONS

Biochemical basis for control of plaque-related oral diseases in the normal and compromised host: periodontal diseases. Van Dyke, T.E. and Zinney, W.B., 1588!

Host defenses and microbial homeostasis: role of microbial interactions. Marsh, P.D., 1567!

HYDROCORTISONE

Effect of exercise on salivary composition and cortisol in serum and saliva in man. Ben-Aryeh, H., *et al.*, 1495

HYDROGEN-ION CONCENTRATION

Criteria for efficacy of plaque control agents for caries. Stephen, K.W., 1672!

Effect of pH on the sensitivity of species of *Lactobacillus* to chlorhexidine and the antibiotics Minocycline and Spiramycin, The. Cleghorn, B. and Bowden, G.H., 1146

Effects of carbohydrate pulses and pH on population shifts within oral microbial communities *in vitro*. Bradshaw, D.J., *et al.*, 1298

In vivo effects of zinc and chlorhexidine on dental plaque ureolysis and glycolysis. Giertsen, E., *et al.*, 1132

Increased pH-lowering ability of *streptococcus mutans* cell masses associated with extracellular glucan-rich matrix material and the mechanisms involved. Van Houte, J., *et al.*, 451

Interpretation of CO_2 equilibration data to obtain plaque fluid buffer capacities, and comparison with results obtained by titration, The. Dibdin, G.H. and Shellis, R.P., 1323

Prevention of sucrose-induced demineralization of tooth enamel by chewing sorbitol gum. Kashket, S., *et al.*, 460

HYDROXYAPATITES

Adsorption of 4-methacryloxyethyl trimellitate anhydride (4-META) on hydroxyapatite and its role in composite bonding. Misra, D.N., 42

Bacterial adhesion to oral tissues: a model for infectious diseases. Gibbons, R.J., 750

Clinical, radiographic, and histological evaluation of permucosal dental implants of dense hydroxylapatite in dogs, A. De Lange, G.L., *et al.*, 509

Electron probe micro-analysis for subsurface demineralization and remineralization of dental enamel. Chu, J.S., *et al.*, 26

Relative adherence of *Bacteroides* species and strains to *Actinomyces viscosus* on saliva-coated hydroxyapatite. Li, J. and Ellen, R.P., 1308

Resolution of ion translocating proteolipid subclasses active in bacterial calcification. Swain, L.D., *et al.*, 1094

HYDROXYTRYPTAMINE (*see* **Serotonin**)

HYPOPHOSPHATEMIA, FAMILIAL

Microscopic and crystallographic examinations of the teeth of the X-linked hypophosphatemic mouse. Abe, K., *et al.*, 1519

IADR/AADR

Abstracts, IADR/ADDR, 170-418, 855-1025

Dental research: problems, progress, and prognosis. Newbrun, E., 1377*

Divisional abstracts, 523-743

Editorial: does the *JDR* play favorites, how good is the *Journal* anyway, and should you subscribe? Dawes, C., 1469*

Guest editorial: let your vote be counted. Newburn, E., 1293*

IADR/AADR council proceedings, general and annual sessions, 1381-1428, 1433-1464

IMMUNITY, NATURAL

Biochemical basis for control of plaque-related oral diseases in the normal and compromised host: periodontal diseases. Van Dyke, T.E. and Zinney, W.B., 1588!

Biochemical basis for control of plaque-related oral diseases (normal and compromised host): mucosal diseases. Shillitoe, E.J., 1597!

Host defenses and microbial homeostasis: role of microbial interactions. Marsh, P.D., 1567!

IMMUNOSUPPRESSION

Biochemical basis for control of plaque-related oral diseases (normal and compromised host): mucosal diseases. Shillitoe, E.J., 1597!

INCISOR

Three-dimensional evaluation of the effects of functional occlusal forces on the morphology of dental and periodontal tissues of the rat incisor, A. Steigman, S., *et al.*, 1269

INDIUM

Effect of admixed indium on mercury vapor release from dental amalgam. Powell, L.V., 1231

INFECTION

Biochemical basis for control of plaque-related oral diseases (normal and compromised host): mucosal diseases. Shillitoe, E.J., 1597!

INTERLEUKIN 1

Fibroblastic subpopulations in uninjured and

wounded rabbit oral mucosa. Bronson, R.E., *et al.*, 51

IRON

Iron concentration in teeth of tetra-odontiform fishes and its phylogenetic significance. Suga, S., *et al.*, 1115

ISOPROTERENOL

Transglutaminase expression in rat parotid gland after isoproterenol stimulation. Cocuzzi, E., *et al.*, 1474

JAW

Comparison of jaw-muscle cross-sections obtained by means of magnetic resonance imaging and high-resolution CT-scanning. van Spronsen, P.H., *et al.*, 1765

Jaw pain and stiffness levels after repeated maximum voluntary clenching. Clark, G.T., *et al.*, 69

Modeling of jaw-head-neck dynamics during whiplash. Schneider, K., *et al.*, 1360

Relationship between jaw muscle volume and craniofacial form. Gionhaku, N. and Lowe, A.A., 805

Relationships between the size, position, and angulation of human jaw muscles and unilateral first molar bite force. Sasaki, K., *et al.*, 499

JOURNALISM, DENTAL

Survey of reference accuracy in five national dental journals, A. Doms, C.A., 442

KENYA

Associations between salivary levels of *Streptococcus mutans*, lactobacilli, and caries experience in Kenyan adolescents. Beighton, D., *et al.*, 1242

LACTOBACILLUS

Associations between salivary levels of *Streptococcus mutans*, lactobacilli, and caries experience in Kenyan adolescents. Beighton, D., *et al.*, 1242

Effect of pH on the sensitivity of species of *Lactobacillus* to chlorhexidine and the antibiotics Minocycline and Spiramycin, The. Cleghorn, B. and Bowden, G.H., 1146

Microflora associated with the development of initial enamel decalcification below orthodontic bands *in vivo* in children living in a fluoridated-water area, The. Boyar, R.M., *et al.*, 1734

Physiology of fluoride inhibition of oral bacteria. Marquis, R.E., 1694!

LECTINS

Stability of the glucan-binding lectin of oral streptococci. Liang, L., *et al.*, 1677!

LIGHT ACTIVATION UNITS

Output from visible-light activation units and depth of cure of light-activated composites. McCabe, J.F. and Carrick, T.E., 1534

LIPASE

Purification of lingual amylase from serous glands of rat tongue and characterization of rat lingual amylase and lingual lipase. Field, R.B., *et al.*, 139

LYMPHOCYTES, T

Effects of submandibularectomy on the thymus and T-cell system of mice, The. Letic-Gavrilovic, A., *et al.*, 1252

T helper and T suppressor cell reversal during the development of induced rat periapical lesions. Stashenko, P. and Yu, S.M., 830

MAGNETIC RESONANCE IMAGING

Comparison of jaw-muscle cross-sections obtained by means of magnetic resonance imaging and high-resolution CT-scanning. van Spronsen, P.H., *et al.*, 1765

MANDIBLE

Concentration of dietary casein required for normal mandibular growth in the rat, The. Bozzini, C., *et al.*, 840

MANNITOL

Potential of xylitol, mannitol, and sorbose to inhibit metabolism in *Streptococcus sobrinus* OMZ 176. Assev, S., *et al.*, 1729!

MASSETER MUSCLES (*see* Masticatory Muscles)

MASTICATION

Effect of daily gum-chewing on salivary flow rates in man, The. Jenkins, G.N. and Edgar, W.M., 786

MASTICATORY MUSCLES

Comparison of jaw-muscle cross-sections obtained by means of magnetic resonance imaging and high-resolution CT-scanning. van Spronsen, P.H., *et al.*, 1765

EMG power spectrum patterns of anterior temporal and masseter muscles in children and adults. Yuen, S.W.H., *et al.*, 800

Jaw pain and stiffness levels after repeated maximum voluntary clenching. Clark, G.T., *et al.*, 69

Relationship between jaw muscle volume and craniofacial form. Gionhaku, N. and Lowe, A.A., 805

Relationships between the size, position, and angulation of human jaw muscles and unilateral first molar bite force. Sasaki, K., *et al.*, 499

MATERNAL-FETAL EXCHANGE

Effect of an acute maternal fluoride dose on fetal plasma fluoride levels and enamel fluoride uptake in guinea pigs. Bawden, J.W., *et al.*, 1169

MATRIX PROTEINS (*see* Mineralized Tissue Matrix Proteins)

MAXILLA

Maxillary arch dimensions after palatal surgery at different ages on beagle dogs. Wijdeveld, M.G.M.M., *et al.*, 1105

MERCURY

Contribution of dental amalgam to mercury in blood, The. Snapp, K.R., *et al.*, 780

Effect of admixed indium on mercury vapor release from dental amalgam. Powell, L.V., 1231

Model of mercury vapor transport from amalgam restorations in the oral cavity. Olsson, S., *et al.*, 504

METHACRYLATES

Adsorption of 4-methacryloxyethyl trimellitate anhydride (4-META) on hydroxyapatite and its role in composite bonding. Misra, D.N., 42

New porcelain repair system with a silane coupler, ferric chloride, and adhesive opaque resin, A. Matsumura, H., *et al.*, 813

Oligomers with pendant isocyanate groups as adhesives for dentin and other tissues. Lee, C.H. and Brauer, G.M., 484

METHYLMETHACRYLATES

Mechanical properties of poly(alkyl a-fluoroacrylate)s as denture-base materials. Kurata, S. and Yamazaki, N., 481

MICE

Effect of force level on synthesis of type III and type I collagen in mouse interparietal suture. Yen, E.H.K., *et al.*, 1746

Effect of sutural growth rate on collagen phenotype synthesis, The. Yen, E.H.K., *et al.*, 1058

Effects of submandibularectomy on the thymus and T-cell system of mice, The. Letic-Gavrilovic, A., *et al.*, 1252

Genotoxic evaluation of chronic fluoride exposure: micronucleus and sperm morphology studies. Dunipace, A.J., *et al.*, 1525

In vitro effects of calcitonin and/or parathyroid hormone on odontogenesis of mouse embryonic molars. Sakakura, Y., *et al.*, 1279

Microscopic and crystallographic examinations of the teeth of the X-linked hypophosphatemic mouse. Abe, K., *et al.*, 1519

MICROBIAL SENSITIVITY TESTS

Effect of pH on the sensitivity of species of *Lactobacillus* to chlorhexidine and the antibiotics Minocycline and Spiramycin, The. Cleghorn, B. and Bowden, G.H., 1146

MICRONUCLEUS TESTS

Genotoxic evaluation of chronic fluoride exposure: micronucleus and sperm morphology studies. Dunipace, A.J., *et al.*, 1525

MICROSCOPY

Microscopic and crystallographic examinations of the teeth of the X-linked hypophosphatemic mouse. Abe, K., *et al.*, 1519

MICROSCOPY, ELECTRON

Microstructural features of carious enamel imaged with back-scattered electrons. Pearce, E.I.F. and Nelson, D.G.A., 113

MICROSCOPY, ELECTRON, SCANNING

Scanning electron microscopic characterization of sensitive *vs.* insensitive human radicular dentin. Yoshiyama, M., *et al.*, 1498

Scanning electron microscopy of monkey secretory- and transitional-stage enamel organ cells. Skobe, Z., *et al.*, 1173

MICROSCOPY, FLUORESCENCE

Confocal optical microscope study of the morphology of the tooth/restoration interface using Scotchbond 2 dentin adhesive, A. Watson, T.F., 1124

MICROSCOPY, SCANNING, ACOUSTIC

Studies on sound and carious enamel with the quantitative acoustic microscope. Peck, S.D., *et al.*, 107

MILK

Influence of milk and food on fluoride bioavailability from NaF and Na_2FPO_3 in man. Trautner, K. and Einwag, J., 72

MINERALIZED TISSUE MATRIX PROTEINS

Guest editorial: what's in a name? the function of the mineralized tissue matrix proteins. Boskey, A.L., 159*

Possible function of matrix proteins in fluoride incorporation into enamel mineral during porcine amelogenesis. Aoba, T., *et al.*, 1162

Possible roles of partial sequences at N- and C-termini of amelogenin in protein-enamel mineral interaction. Aoba, T., *et al.*, 1331

MINOCYCLINE

Effect of pH on the sensitivity of species of *Lactobacillus* to chlorhexidine and the antibiotics Minocycline and Spiramycin, The. Cleghorn, B. and Bowden, G.H., 1146

MODELS, DENTAL

Analysis of factors influencing diffusion from dental plaque into a moving film of saliva and the implications for caries, An. Dawes, C., 1483

Biostatistical and methodological issues in demonstrating efficacy of therapeutic agents for periodontal disease. DeRouen, T.A., 1661!

Computer model relating chemistry to biological activity of metal anti-plaque agents. Cummins, D. and Watson, G.K., 1702!

Criteria for efficacy of plaque control agents for caries. Stephen, K.W., 1672!

Finite element method simulation of bone resorption beneath a complete denture. Maeda, Y. and Wood, W.W., 1370

Modeling of jaw-head-neck dynamics during whiplash. Schneider, K., *et al.*, 1360

MOLAR

Dental plaque and caries on occlusal surfaces of first permanent molars in relation to stage of eruption. Carvalho, J.C., *et al.*, 773

Differences in the rate of molar wear between monkeys raised on different diets. Teaford, M.F. and Oyen, O.J., 1513

In vitro effects of calcitonin and/or parathyroid hormone on odontogenesis of mouse embryonic molars. Sakakura, Y., *et al.*, 1279

MONKEYS

Differences in the rate of molar wear between monkeys raised on different diets. Teaford, M.F. and Oyen, O.J., 1513

Inhibition of bacterial growth under composite restorations following GLUMA pretreatment. Felton, D., *et al.*, 491

Scanning electron microscopy of monkey secretory- and transitional-stage enamel organ cells. Skobe, Z., *et al.*, 1173

Tissue distribution of RNAs for cystatins, histatins, statherin, and proline-rich salivary proteins in humans and macaques. Sabatini, L.M., *et al.*, 1138

MOROCCO

Effects of airborne fluorides on oral conditions in Morocco, The. Haikel, Y., *et al.*, 1238

MORPHOGENESIS

Bovine tooth-derived bone morphogenetic protein. Kawai, T. and Urist, M.R., 1069

MOTTLED ENAMEL

Effects of airborne fluorides on oral conditions in Morocco, The. Haikel, Y., *et al.*, 1238

Modified DDE index for use in epidemiological studies of enamel defects, Clarkson, J. and O'Mullane, D., 445

MOUTH MUCOSA (*see* ORAL MUCOSA)

MOUTHWASHES

Chlorhexidine interactions with sodium lauryl sulfate *in vivo*. Barkvoll, P., *et al.*, 1722!

Clinical effectiveness of a 0.12% chlorhexidine mouthrinse over two years. Banting, D., *et al.*, 1716!

Delivery systems for agents in supra- and subgingival plaque control. Van Der Ouderaa, F.J. and Cummins, D., 1617!

Effect of two years' use of 0.12% chlorhexidine on plaque bacteria. Briner, W., *et al.*, 1719!

Maintenance of gingival health by a dentifrice containing zinc citrate and triclosan. Saxton, C.A., 1724!

Non-antibacterial approach to prevent plaque formation, A. Giertsen, E., *et al.*, 1683!

Oral gram-negative bacilli in bone marrow transplant patients given chlorhexidine rinses. Brown, A.T., *et al.*, 1199

MUCOLYTIC AGENTS

N-Acetylcysteine, a mucolytic agent as a plaque inhibitor. Bowles, W.H., 1698!

MUSCLE CONTRACTION

Jaw pain and stiffness levels after repeated maximum voluntary clenching. Clark, G.T., *et al.*, 69

MUTAGENICITY TESTS

Genotoxic evaluation of chronic fluoride exposure: micronucleus and sperm morphology studies. Dunipace, A.J., *et al.*, 1525

NECK

Modeling of jaw-head-neck dynamics during whiplash. Schneider, K., *et al.*, 1360

NEUROREGULATORS

5-Hydroxytryptamine modulation of rat parotid salivary gland secretion. Chernick, W., *et al.*, 59

NEUTROPHILS

Biochemical basis for control of plaque-related oral diseases in the normal and compromised host: periodontal diseases. Van Dyke, T.E. and Zinney, W.B., 1588!

New method for isolation of salivary neutrophils and determination of their functional activity, A. Ashkenazi, M. and Dennison, D.K., 1256

NICKEL

Dental casting of titanium and Ni-Ti alloys by new casting machine. Hamanaka, H., *et al.*, 1529

NUTRITION

Roles of saliva (pellicle), diet, and nutrition on plaque formation. Tabak, L.A. and Bowen, W.H., 1560!

ODONTOBLASTS

Demonstration of physiological barrier between pulpal odontoblasts and its perturbation following routine restorative procedures: a horseradish peroxidase tracing study in the rat. Turner, D.F., *et al.*, 1262

ODONTOGENESIS

In vitro effects of calcitonin and/or parathyroid hormone on odontogenesis of mouse embryonic molars. Sakakura, Y., *et al.*, 1279

OILS, ESSENTIAL

Modes of action of currently known chemical anti-plaque agents other than chlorhexidine. Scheie, A.AA., 1609!

ORAL HEALTH

Prevalence of and factors associated with root decay in older adults in Canada. Locker, D., *et al.*, 768

ORAL MUCOSA

Bacterial adhesion to oral tissues: a model for infectious diseases. Gibbons, R.J., 750

Biochemical basis for control of plaque-rela-

ted oral diseases (normal and compromised host): mucosal diseases. Shillitoe, E.J., 1597!
Fibroblastic subpopulations in uninjured and wounded rabbit oral mucosa. Bronson, R.E., *et al.*, 51
Host defenses and microbial homeostasis: role of microbial interactions. Marsh, P.D., 1567!
Measurement *in vivo* of masticatory mucosal thickness with 20 MHz B-mode ultrasonic diagnostic equipment. Uchida, H., *et al.*, 95
Permeability of human oral mucosa and skin to water, The. Lesch, C.A., *et al.*, 1345

ORTHODONTICS

Effect of force level on synthesis of type III and type I collagen in mouse interparietal suture. Yen, E.H.K., *et al.*, 1746

PAIN

Jaw pain and stiffness levels after repeated maximum voluntary clenching. Clark, G.T., *et al.*, 69

PALATE

Maxillary arch dimensions after palatal surgery at different ages on beagle dogs. Wijdeveld, M.G.M.M., *et al.*, 1105

PAPILLOMAVIRUSES

Biochemical basis for control of plaque-related oral diseases (normal and compromised host): mucosal diseases. Shillitoe, E.J., 1597!

PARATHYROID HORMONES

In vitro effects of calcitonin and/or parathyroid hormone on odontogenesis of mouse embryonic molars. Sakakura, Y., *et al.*, 1279
Initial characterization of cells derived from human periodontia. Piche, J.E., *et al.*, 761

PAROTID GLANDS (*see* Salivary Glands)

PEER REVIEW

Conference Report: First International Congress on Peer Review in Biomedical Publications, Chicago, Illinois, May 10-12, 1989. Hand, A.R. and Dawes, C., 1375@
Whither peer review? Taubman, Martin A., 1379*

PELLICLE

Adherence of *Streptococcus mutans* to glucans formed *in situ* in salivary pellicle. Schilling, K.M., *et al.*, 1678!
Effects of pellicle formation on streptococcal adhesion to human enamel and artificial substrata with various surface free-energies, The. Pratt-Terpstra, I.H., *et al.*, 463
N-Acetylcysteine, a mucolytic agent as a plaque inhibitor. Bowles, W.H., 1698!
Roles of saliva (pellicle), diet, and nutrition on plaque formation. Tabak, L.A. and Bowen, W.H., 1560!

PEPTIDES

Catabolism of arginine-containing peptides by *Streptococcus sanguis*, The. Rogers, A.H., *et al.*, 1686!
Vasoactive intestinal peptide interacts with alpha-adrenergic-, cholinergic-, and substance-P mediated responses in rat parotid and submandibular glands. Bobyock, E. and Chernick, W.S., 1489

PEPTOSTREPTOCOCCUS

Serological studies of *Peptostreptococci* using an indirect fluorescent antibody test. Collins, M.L.Z., *et al.*, 1508

PERIAPICAL PERIODONTITIS

T helper and T suppressor cell reversal during the development of induced rat periapical lesions. Stashenko, P. and Yu, S.M., 830

PERIODONTAL DISEASE

Biochemical basis for control of plaque-related oral diseases in the normal and compromised host: periodontal diseases. Van Dyke, T.E. and Zinney, W.B., 1588!
Biostatistical and methodological issues in demonstrating efficacy of therapeutic agents for periodontal disease. DeRouen, T.A., 1661!
Correlation between serum and gingival crevicular fluid antibodies and periodontal status. Horino, K., *et al.*, 1688!
Criteria for efficacy of plaque control agents for periodontal disease: microbiology. Ranney, R.R., 1655!
Design of trials to test the efficacy of plaque control agents for periodontal diseases in humans, The. Robertson, P.B., *et al.*, 1667!

PERIODONTAL LIGAMENT

Clinical trial of intraligamentary anesthesia, A. Edwards, R.W. and Head, T.W., 1210

PERIODONTAL TISSUE

Three-dimensional evaluation of the effects of functional occlusal forces on the morphology of dental and periodontal tissues of the rat incisor, A. Steigman, S., *et al.*, 1269

PERIODONTITIS

Microbiological observations at periodic subgingival antimicrobial irrigation of periodontal pockets. Dahlén, G., *et al.*, 1714!
Specific subgingival bacteria and diagnosis of gingivitis and periodontitis. Christersson, L.A., *et al.*, 1633!

PERIODONTIUM

Characterization of one phenotype of human periodontal granulation-tissue fibroblasts. Larjava, H., *et al.*, 20
Initial characterization of cells derived from human periodontia. Piche, J.E., *et al.*, 761

PERMEABILITY

Permeability of human oral mucosa and skin to water, The. Lesch, C.A., *et al.*, 1345

pH (*see* Hydrogen-Ion Concentration)

PHARMACOKINETICS

Pharmacokinetic principles controlling efficacy of oral therapy. Goodson, J.M., 1625!

PHENOLS

Modes of action of currently known chemical anti-plaque agents other than chlorhexidine. Scheie, A.AA., 1609!

PHENYLEPHRINE

Vasoactive intestinal peptide interacts with alpha-adrenergic-, cholinergic-, and substance-P mediated responses in rat parotid and submandibular glands. Bobyock, E. and Chernick, W.S., 1489

PLATELET-DERIVED GROWTH FACTOR

Initial characterization of cells derived from human periodontia. Piche, J.E., *et al.*, 761

POLYMERIZATION SHRINKAGE

In vitro investigation of the effects of glass inserts on the effective composite resin polymerization shrinkage, An. Donly, K.J., *et al.*, 1234
Increased wall-to-wall curing contraction in thin bonded resin layers. Feilzer, A.J., *et al.*, 48

POLYMERS

Mechanical properties of poly(alkyl a-fluoroacrylate)s as denture-base materials. Kurata, S. and Yamazaki, N., 481

POLYMETHYLMETHACRYLATES (*see* Methylmethacrylates)

POLYMORPHONUCLEAR LEUKOCYTES (*see* Neutrophils)

PROLINE

Adsorbed salivary acidic proline-rich proteins contribute to the adhesion of *Streptococcus mutans* JBP to apatitic surfaces. Gibbons, R.J. and Hay, D.I., 1303
Genetics of human salivary proteins. Minaguchi, K., *et al.*, 2
Tissue distribution of RNAs for cystatins, histatins, statherin, and proline-rich salivary proteins in humans and macaques. Sabatini, L.M., *et al.*, 1138

PROTEINS

Adsorbed salivary acidic proline-rich proteins contribute to the adhesion of *Streptococcus mutans* JBP to apatitic surfaces. Gibbons, R.J. and Hay, D.I., 1303
Alteration of enamel proteins in hypomaturation amelogenesis imperfecta. Wright, J.T. and Butler, W.T., 1328
Bovine tooth-derived bone morphogenetic protein. Kawai, T. and Urist, M.R., 1069
Guest editorial: what's in a name? the func-

tion of the mineralized tissue matrix proteins. Boskey, A.L., 159*
Protein dissimilation by human salivary-sediment bacteria. Reynolds, E.C., and Riley, P.F., 124

PROTEOGLYCANS

Characterization of one phenotype of human periodontal granulation-tissue fibroblasts. Larjava, H., *et al.*, 20

PROTEOLIPIDS

Resolution of ion translocating proteolipid subclasses active in bacterial calcification. Swain, L.D., *et al.*, 1094

PUTRESCINE

Protein dissimilation by human salivary-sediment bacteria. Reynolds, E.C., and Riley, P.F., 124

QUATERNARY AMMONIUM COMPOUNDS

Modes of action of currently known chemical anti-plaque agents other than chlorhexidine. Scheie, A.AA., 1609!

RABBITS

Fibroblastic subpopulations in uninjured and wounded rabbit oral mucosa. Bronson, R.E., *et al.*, 51

RADIOGRAPHY, DENTAL

Clinical *vs.* arthrographic diagnosis of TMJ internal derangement. Anderson, G.C., *et al.*, 826
Efficacy of panoramic radiography in dental diagnosis and treatment planning. Kantor, M.L. and Slome, B.A., 810

RATS

Changes in the tartrate-resistant acid phosphatase cell population in dental follicles and bony crypts of rat molars during tooth eruption. Wise, G.E. and Fan, W., 150
Concentration of dietary casein required for normal mandibular growth in the rat, The. Bozzini, C., *et al.*, 840
Cytochemical study of horseradish peroxidase uptake in rat junctional epithelium. Ayasaka, N. and Tanaka, T., 1503
Demonstration of physiological barrier between pulpal odontoblasts and its perturbation following routine restorative procedures: a horseradish peroxidase tracing study in the rat. Turner, D.F., *et al.*, 1262
Effect of chronic atropine treatment on salivary composition and caries in rats, The. Watson, G.E., *et al.*, 1739
Effects of thyroxine and dexamethasone on rat submandibular glands. Sagulin, G.-B. and Roomans, G.M., 1247
5-Hydroxytryptamine modulation of rat parotid salivary gland secretion. Chernick, W., *et al.*, 59
Purification of lingual amylase from serous glands of rat tongue and characterization of rat lingual amylase and lingual lipase. Field, R.B., *et al.*, 139
Role of parotid amylase in starch digestion in the gastro-intestinal tracts of diabetic rats. Kurahashi, M. and Inomata, K., 1366
T helper and T suppressor cell reversal during the development of induced rat periapical lesions. Stashenko, P. and Yu, S.M., 830
Three-dimensional evaluation of the effects of functional occlusal forces on the morphology of dental and periodontal tissues of the rat incisor, A. Steigman, S., *et al.*, 1269
Transglutaminase expression in rat parotid gland after isoproterenol stimulation. Cocuzzi, E., *et al.*, 1474
Vasoactive intestinal peptide interacts with alpha-adrenergic-, cholinergic-, and substance-P mediated responses in rat parotid and submandibular glands. Bobyock, E. and Chernick, W.S., 1489

RECEPTORS, ADRENERGIC, ALPHA

Vasoactive intestinal peptide interacts with alpha-adrenergic-, cholinergic-, and substance-P mediated responses in rat parotid and submandibular glands. Bobyock, E. and Chernick, W.S., 1489

RECEPTORS, CHOLINERGIC

Vasoactive intestinal peptide interacts with alpha-adrenergic-, cholinergic-, and substance-P mediated responses in rat parotid and submandibular glands. Bobyock, E. and Chernick, W.S., 1489

RESEARCH

Dental research: problems, progress, and prognosis. Newbrun, E., 1377*
Guest editorial: collaborative research between the People's Republic of China and other countries. Yu, Qin-Xi, 1470*
Guest editorial: the development of dental research in Taiwan. Shiau, Y.-Y., 1214*

RESEARCH DESIGN

Biostatistical and methodological issues in demonstrating efficacy of therapeutic agents for periodontal disease. DeRouen, T.A., 1661!
Design of trials to test the efficacy of plaque control agents for periodontal diseases in humans, The. Robertson, P.B., *et al.*, 1667!

RESINS

Fractography of a bis-GMA resin. Davis, D.M. and Waters, N.E., 1194
Mechanical properties of poly(alkyl a-fluoroacrylate)s as denture-base materials. Kurata, S. and Yamazaki, N., 481
New porcelain repair system with a silane coupler, ferric chloride, and adhesive opaque resin, A. Matsumura, H., *et al.*, 813

RESTRICTION ENDONUCLEASE (*see* DNA Restriction Enzymes)

RHEOLOGY

Rheological properties of elastomers during setting. McCabe, J.F. and Carrick, T.E., 1218

RNA, NUCLEAR

Tissue distribution of RNAs for cystatins, histatins, statherin, and proline-rich salivary proteins in humans and macaques. Sabatini, L.M., *et al.*, 1138

SALIVA

Adherence of *Streptococcus mutans* to glucans formed *in situ* in salivary pellicle. Schilling, K.M., *et al.*, 1678!
Adsorbed salivary acidic proline-rich proteins contribute to the adhesion of *Streptococcus mutans* JBP to apatitic surfaces. Gibbons, R.J. and Hay, D.I., 1303
Analysis of factors influencing diffusion from dental plaque into a moving film of saliva and the implications for caries, An. Dawes, C., 1483
Associations between salivary levels of *Streptococcus mutans*, lactobacilli, and caries experience in Kenyan adolescents. Beighton, D., *et al.*, 1242
Effect of chronic atropine treatment on salivary composition and caries in rats, The. Watson, G.E., *et al.*, 1739
Effect of exercise on salivary composition and cortisol in serum and saliva in man. Ben-Aryeh, H., *et al.*, 1495
Estimation of the velocity of the salivary film at some different locations in the mouth. Dawes, C., *et al.*, 1479
Model of mercury vapor transport from amalgam restorations in the oral cavity. Olsson, S., *et al.*, 504
Molecular aspects of adherence of *Actinomyces viscosus* and *Actinomyces naeslundii* to oral surfaces. Cisar, J.O., *et al.*, 1558!
N-Acetylcysteine, a mucolytic agent as a plaque inhibitor. Bowles, W.H., 1698!
New method for isolation of salivary neutrophils and determination of their functional activity, A. Ashkenazi, M. and Dennison, D.K., 1256
New method for the estimation of mutans streptococci in human saliva, A. Jensen, B. and Bratthall, D., 468
Non-antibacterial approach to prevent plaque formation, A. Giertsen, E., *et al.*, 1683!
On changing the cariogenic chemistry of coronal plaque. Tanzer, J.M., 1576!
Pharmacokinetic principles controlling efficacy of oral therapy. Goodson, J.M., 1625!
Protein dissimilation by human salivary-sediment bacteria. Reynolds, E.C., and Riley, P.F., 124
Relative adherence of *Bacteroides* species and strains to *Actinomyces viscosus* on saliva-coated hydroxyapatite. Li, J. and Ellen, R.P., 1308
Remineralization of artificial caries-like lesions in human enamel *in situ* by chewing sorbitol gum. Leach, S.A., *et al.*, 1064
Roles of saliva (pellicle), diet, and nutrition on plaque formation. Tabak, L.A. and Bowen, W.H., 1560!
Studies on fluoride concentrations in human

submandibular/sublingual saliva and their relation to flow rate and plasma fluoride levels. Oliveby, A., *et al.*, 146

SALIVARY GLANDS

Effect of daily gum-chewing on salivary flow rates in man, The. Jenkins, G.N. and Edgar, W.M., 786

PAROTID

5-Hydroxytryptamine modulation of rat parotid salivary gland secretion. Chernick, W., *et al.*, 59

Role of parotid amylase in starch digestion in the gastro-intestinal tracts of diabetic rats. Kurahashi, M. and Inomata, K., 1366

Transglutaminase expression in rat parotid gland after isoproterenol stimulation. Cocuzzi, E., *et al.*, 1474

Vasoactive intestinal peptide interacts with alpha-adrenergic-, cholinergic-, and substance-P mediated responses in rat parotid and submandibular glands. Bobyock, E. and Chernick, W.S., 1489

SUBLINGUAL

Studies on fluoride concentrations in human submandibular/sublingual saliva and their relation to flow rate and plasma fluoride levels. Oliveby, A., *et al.*, 146

SUBMANDIBULAR

Effects of submandibularectomy on the thymus and T-cell system of mice, The. Letic-Gavrilovic, A., *et al.*, 1252

Effects of thyroxine and dexamethasone on rat submandibular glands. Sagulin, G.-B. and Roomans, G.M., 1247

Studies on fluoride concentrations in human submandibular/sublingual saliva and their relation to flow rate and plasma fluoride levels. Oliveby, A., *et al.*, 146

Vasoactive intestinal peptide interacts with alpha-adrenergic-, cholinergic-, and substance-P mediated responses in rat parotid and submandibular glands. Bobyock, E. and Chernick, W.S., 1489

SALIVARY PROTEINS

Effects of pellicle formation on streptococcal adhesion to human enamel and artificial substrata with various surface free-energies, The. Pratt-Terpstra, I.H., *et al.*, 463

Genetics of human salivary proteins. Minaguchi, K., *et al.*, 2

Roles of saliva (pellicle), diet, and nutrition on plaque formation. Tabak, L.A. and Bowen, W.H., 1560!

Tissue distribution of RNAs for cystatins, histatins, statherin, and proline-rich salivary proteins in humans and macaques. Sabatini, L.M., *et al.*, 1138

SALIVATION

Effect of daily gum-chewing on salivary flow rates in man, The. Jenkins, G.N. and Edgar, W.M., 786

SANGUINARIA EXTRACT

Modes of action of currently known chemical anti-plaque agents other than chlorhexidine. Scheie, A.AA., 1609!

SEROTONIN

5-Hydroxytryptamine modulation of rat parotid salivary gland secretion. Chernick, W., *et al.*, 59

SEROUS GLAND

Purification of lingual amylase from serous glands of rat tongue and characterization of rat lingual amylase and lingual lipase. Field, R.B., *et al.*, 139

SILANES

New porcelain repair system with a silane coupler, ferric chloride, and adhesive opaque resin, A. Matsumura, H., *et al.*, 813

SILICIC ACID

Effect of silicic acid on calcium phosphate precipitation. Damen, J.J.M. and Ten Cate, J.M., 1355

SILICONE ELASTOMERS

Rheological properties of elastomers during setting. McCabe, J.F. and Carrick, T.E., 1218

SKIN

Permeability of human oral mucosa and skin to water, The. Lesch, C.A., *et al.*, 1345

SKULL

Conference Report: advances in craniofacial developmental biology and their clinical implications. Report on a symposium... Sperber, G.H., 1294@

Effect of force level on synthesis of type III and type I collagen in mouse interparietal suture. Yen, E.H.K., *et al.*, 1746

Effect of sutural growth rate on collagen phenotype synthesis, The. Yen, E.H.K., *et al.*, 1058

SODIUM DODECYL SULFATE

Chlorhexidine interactions with sodium lauryl sulfate *in vivo*. Barkvoll, P., *et al.*, 1722!

Modes of action of currently known chemical anti-plaque agents other than chlorhexidine. Scheie, A.AA., 1609!

SODIUM FLUORIDE

Comparison of fluoride uptake produced by tray and flossing methods *in vitro*. Guo, M.K., *et al.*, 496

SORBITOL

Prevention of sucrose-induced demineralization of tooth enamel by chewing sorbitol gum. Kashket, S., *et al.*, 460

Remineralization of artificial caries-like lesions in human enamel *in situ* by chewing sorbitol gum. Leach, S.A., *et al.*, 1064

SORBOSE

Potential of xylitol, mannitol, and sorbose to inhibit metabolism in *Streptococcus sobrinus* OMZ 176. Assev, S., *et al.*, 1729!

SPIRAMYCINS

Effect of pH on the sensitivity of species of *Lactobacillus* to chlorhexidine and the antibiotics Minocycline and Spiramycin, The. Cleghorn, B. and Bowden, G.H., 1146

SPLEEN

Effects of submandibularectomy on the thymus and T-cell system of mice, The. Letic-Gavrilovic, A., *et al.*, 1252

STARCH

Role of parotid amylase in starch digestion in the gastro-intestinal tracts of diabetic rats. Kurahashi, M. and Inomata, K., 1366

STATHERIN

Tissue distribution of RNAs for cystatins, histatins, statherin, and proline-rich salivary proteins in humans and macaques. Sabatini, L.M., *et al.*, 1138

STATISTICS

Adjustment of frequently used chi-square procedures for the effect of site-to-site dependencies in the analysis of dental data. Donner, A. and Banting, D., 1350

Biostatistical and methodological issues in demonstrating efficacy of therapeutic agents for periodontal disease. DeRouen, T.A., 1661!

STREPTOCOCCUS

Effect of pH on the sensitivity of species of *Lactobacillus* to chlorhexidine and the antibiotics Minocycline and Spiramycin, The. Cleghorn, B. and Bowden, G.H., 1146

Microflora associated with the development of initial enamel decalcification below orthodontic bands *in vivo* in children living in a fluoridated-water area, The. Boyar, R.M., *et al.*, 1734

Molecular aspects of adherence of *Actinomyces viscosus* and *Actinomyces naeslundii* to oral surfaces. Cisar, J.O., *et al.*, 1558!

Physiology of fluoride inhibition of oral bacteria. Marquis, R.E., 1694!

Stability of the glucan-binding lectin of oral streptococci. Liang, L., *et al.*, 1677!

MITIS

Effects of pellicle formation on streptococcal adhesion to human enamel and artificial substrata with various surface free-energies, The. Pratt-Terpstra, I.H., *et al.*, 463

MUTANS

Adherence of *Streptococcus mutans* to glucans formed *in situ* in salivary pellicle. Schilling, K.M., *et al.*, 1678!

Adsorbed salivary acidic proline-rich proteins contribute to the adhesion of *Streptococcus*

mutans JBP to apatitic surfaces. Gibbons, R.J. and Hay, D.I., 1303
Associations between salivary levels of *Streptococcus mutans*, lactobacilli, and caries experience in Kenyan adolescents. Beighton, D., *et al.*, 1242
Bacterial adhesion to oral tissues: a model for infectious diseases. Gibbons, R.J., 750
Difference in amounts between titratable acid and total carboxylic acids produced by oral streptococci during sugar metabolism. Iwami, Y., *et al.*, 16
Effects of pellicle formation on streptococcal adhesion to human enamel and artificial substrata with various surface free-energies, The. Pratt-Terpstra, I.H., *et al.*, 463
Effects of sustained-release chlorhexidine acetate on the human dental plaque flora. Schaeken, M.J.M. and De Haan, P., 119
Effects of varnishes containing chlorhexidine on the human dental plaque flora. Schaeken, M.J.M., *et al.*, 1786
Increased pH-lowering ability of *streptococcus mutans* cell masses associated with extracellular glucan-rich matrix material and the mechanisms involved. Van Houte, J., *et al.*, 451
Investigation into the use of restriction endonuclease analysis for the study of transmission of mutans streptococci, An. Kulkarni, G.V., *et al.*, 1155
New method for the estimation of mutans streptococci in human saliva, A. Jensen, B. and Bratthall, D., 468
On changing the cariogenic chemistry of coronal plaque. Tanzer, J.M., 1576!
Prevention of sucrose-induced demineralization of tooth enamel by chewing sorbitol gum. Kashket, S., *et al.*, 460

SALIVARIUS

Cloning and expression of glycosyltransferase activities from *Streptococcus salivarius*. Pitty, L.J., *et al.*, 1681!

SANGUIS

Catabolism of arginine-containing peptides by *Streptococcus sanguis*, The. Rogers, A.H., *et al.*, 1686!
Difference in amounts between titratable acid and total carboxylic acids produced by oral streptococci during sugar metabolism. Iwami, Y., *et al.*, 16
Effects of pellicle formation on streptococcal adhesion to human enamel and artificial substrata with various surface free-energies, The. Pratt-Terpstra, I.H., *et al.*, 463
Effects of sustained-release chlorhexidine acetate on the human dental plaque flora. Schaeken, M.J.M. and De Haan, P., 119

SOBRINUS

Associations between salivary levels of *Streptococcus mutans*, lactobacilli, and caries experience in Kenyan adolescents. Beighton, D., *et al.*, 1242
Potential of xylitol, mannitol, and sorbose to inhibit metabolism in *Streptococcus sobrinus* OMZ 176. Assev, S., *et al.*, 1729!

STRESS, MECHANICAL

Amalgam margin breakdown caused by creep fatigue rupture. Williams, P.T. and Cahoon, J.R., 1188
Effect of visco-elastic behavior on stress development in a metal-ceramic system: DeHoff, P.H. and Anusavice, K.J., 1223
In vitro investigation of the effects of glass inserts on the effective composite resin polymerization shrinkage, An. Donly, K.J., *et al.*, 1234

SUBMANDIBULAR GLANDS (*see* Salivary Glands)

SUBSTANCE P

Vasoactive intestinal peptide interacts with alpha-adrenergic-, cholinergic-, and substance-P mediated responses in rat parotid and submandibular glands. Bobyock, E. and Chernick, W.S., 1489

SUCROSE

Increased pH-lowering ability of *streptococcus mutans* cell masses associated with extracellular glucan-rich matrix material and the mechanisms involved. Van Houte, J., *et al.*, 451
Prevention of sucrose-induced demineralization of tooth enamel by chewing sorbitol gum. Kashket, S., *et al.*, 460

SUGAR CANE

Effect of sugar cane chewing on the development of dental caries, The. Frencken, J.E., *et al.*, 1102

SUGARS (*see* Carbohydrates)

SULFADIAZINE

Inhibition of plaque formation, prevention and treatment of gingivitis with sulfadiazines in beagles. Howell, T.H., *et al.*, 1712!

SUPPRESSOR CELLS

T helper and T suppressor cell reversal during the development of induced rat periapical lesions. Stashenko, P. and Yu, S.M., 830

SURFACE-ACTIVE AGENTS

Modes of action of currently known chemical anti-plaque agents other than chlorhexidine. Scheie, A.AA., 1609!
Surface tension and contact angle on enamel of surfactant solutions for caries diagnosis with dyes. Van De Rijke, J.W., *et al.*, 1205

SURFACE PROPERTIES

Influence of surface free-energy on planimetric plaque growth in man, The. Quirynen, M., *et al.*, 796
Molecular aspects of adherence of *Actinomyces viscosus* and *Actinomyces naeslundii* to oral surfaces. Cisar, J.O., *et al.*, 1558!

SURFACE TENSION

Surface tension and contact angle on enamel of surfactant solutions for caries diagnosis with dyes. Van De Rijke, J.W., *et al.*, 1205

SURGERY, ORAL

Maxillary arch dimensions after palatal surgery at different ages on beagle dogs. Wijdeveld, M.G.M.M., *et al.*, 1105

T LYMPHOCYTES

Effects of submandibularectomy on the thymus and T-cell system of mice, The. Letic-Gavrilovic, A., *et al.*, 1252
T helper and T suppressor cell reversal during the development of induced rat periapical lesions. Stashenko, P. and Yu, S.M., 830

TAIWAN

Guest editorial: the development of dental research in Taiwan. Shiau, Y.-Y., 1214*

TANNINS

Modes of action of currently known chemical anti-plaque agents other than chlorhexidine. Scheie, A.AA., 1609!

TANZANIA

Cohort effects in the prevalence of caries in child populations in Tanzania. Frencken, J.E., *et al.*, 1777

TEMPORAL MUSCLES (*see* Masticatory Muscles)

TEMPOROMANDIBULAR JOINT

Clinical *vs.* arthrographic diagnosis of TMJ internal derangement. Anderson, G.C., *et al.*, 826
Modeling of jaw-head-neck dynamics during whiplash. Schneider, K., *et al.*, 1360

TENSILE STRENGTH

Influence of admixing microfiller to small-particle composite resin on wear, tensile strength, hardness, and surface roughness, The. Pallav, P., *et al.*, 489

TETRACYCLINES

Collagenase activity in gingival crevicular fluid and inhibition by tetracyclines. Yanagimura, M., *et al.*, 1691!

THYMUS GLAND

Effects of submandibularectomy on the thymus and T-cell system of mice, The. Letic-Gavrilovic, A., *et al.*, 1252

THYROXINE

Effects of thyroxine and dexamethasone on rat submandibular glands. Sagulin, G.-B. and Roomans, G.M., 1247

TIMED-RELEASE PREPARATIONS (*see* Delayed-action Preparations)

TISSUE CULTURE

Initial characterization of cells derived from human periodontia. Piche, J.E., *et al.*, 761

TITANIUM

Antibacterial effect of the powdered semiconductor TiO_2 on the viability of oral microorganisms. Nagame, S., *et al.*, 1696!

Dental casting of titanium and Ni-Ti alloys by new casting machine. Hamanaka, H., *et al.*, 1529

TOMOGRAPHY, X-RAY-COMPUTED

Comparison of jaw-muscle cross-sections obtained by means of magnetic resonance imaging and high-resolution CT-scanning. van Spronsen, P.H., *et al.*, 1765

TONGUE

Purification of lingual amylase from serous glands of rat tongue and characterization of rat lingual amylase and lingual lipase. Field, R.B., *et al.*, 139

TOOTH

Three-dimensional evaluation of the effects of functional occlusal forces on the morphology of dental and periodontal tissues of the rat incisor, A. Steigman, S., *et al.*, 1269

TOOTH ABRASION

Differences in the rate of molar wear between monkeys raised on different diets. Teaford, M.F. and Oyen, O.J., 1513

Quantitative *in vivo* wear of human enamel. Lambrechts, P., *et al.*, 1752

TOOTH DEMINERALIZATION

Electron probe micro-analysis for subsurface demineralization and remineralization of dental enamel. Chu, J.S., *et al.*, 26

Microbiological study of early caries of approximal surfaces in schoolchildren, A. Marsh, P.D., *et al.*, 1151

Prevention of sucrose-induced demineralization of tooth enamel by chewing sorbitol gum. Kashket, S., *et al.*, 460

Quantitative study of fluoride transport during subsurface dissolution of dental enamel. Chu, J.S., *et al.*, 32

Studies on sound and carious enamel with the quantitative acoustic microscope. Peck, S.D., *et al.*, 107

TOOTH EROSION

Depth and area of dental erosions, and dental caries, in bulimic women. Jones, R.R.H. and Cleaton-Jones, P., 1275

TOOTH ERUPTION

Changes in the tartrate-resistant acid phosphatase cell population in dental follicles and bony crypts of rat molars during tooth eruption. Wise, G.E. and Fan, W., 150

Dental plaque and caries on occlusal surfaces of first permanent molars in relation to stage of eruption. Carvalho, J.C., *et al.*, 773

TOOTH REMINERALIZATION

Electron probe micro-analysis for subsurface demineralization and remineralization of dental enamel. Chu, J.S., *et al.*, 26

Fluoride incorporation into and retention in remineralized enamel. Iijima, Y. and Koulourides, T., 1289

Remineralization of artificial caries-like lesions in human enamel *in situ* by chewing sorbitol gum. Leach, S.A., *et al.*, 1064

TOOTH ROOT

Prevalence of and factors associated with root decay in older adults in Canada. Locker, D., *et al.*, 768

TOOTHBRUSHING

Measurements of toothbrush wear, The. Rawls, H.R., *et al.*, 1781

TRANSGLUTAMINASE

Transglutaminase expression in rat parotid gland after isoproterenol stimulation. Cocuzzi, E., *et al.*, 1474

TRANSILLUMINATION

Detection of incipient caries with tracer dyes, The. O'Brien, W.J., *et al.*, 157

TRICLOSAN

Delivery of zinc and triclosan to micro-reservoirs of antibacterial activity. Gilbert, R.J., *et al.*, 1706!

Maintenance of gingival health by a dentifrice containing zinc citrate and triclosan. Saxton, C.A., 1724!

Modes of action of currently known chemical anti-plaque agents other than chlorhexidine. Scheie, A.AA., 1609!

ULTRASONIC DIAGNOSIS

Measurement *in vivo* of masticatory mucosal thickness with 20 MHz B-mode ultrasonic diagnostic equipment. Uchida, H., *et al.*, 95

UREA

In vivo effects of zinc and chlorhexidine on dental plaque ureolysis and glycolysis. Giertsen, E., *et al.*, 1132

VARNISH, DENTAL

Effects of sustained-release chlorhexidine acetate on the human dental plaque flora. Schaeken, M.J.M. and De Haan, P., 119

Effects of varnishes containing chlorhexidine on the human dental plaque flora. Schaeken, M.J.M., *et al.*, 1786

VASOACTIVE INTESTINAL PEPTIDE

Vasoactive intestinal peptide interacts with alpha-adrenergic-, cholinergic-, and substance-P mediated responses in rat parotid and submandibular glands. Bobyock, E. and Chernick, W.S., 1489

VIRUS ACTIVATION

Establishment of latent ganglionic infection with herpes simplex virus *via* maxillary gingiva and viral re-activation *in vivo* after trauma. Shimizu, F., *et al.*, 472

VISUAL PERCEPTION

Assessment of appearance match by visual observation and clinical colorimetry. Johnston, W.M. and Kao, E.C., 819

WHIPLASH INJURIES

Modeling of jaw-head-neck dynamics during whiplash. Schneider, K., *et al.*, 1360

XYLITOL

Modes of action of currently known chemical anti-plaque agents other than chlorhexidine. Scheie, A.AA., 1609!

Potential of xylitol, mannitol, and sorbose to inhibit metabolism in *Streptococcus sobrinus* OMZ 176. Assev, S., *et al.*, 1729!

YEASTS

Criteria for efficacy of plaque control agents for periodontal disease: microbiology. Ranney, R.R., 1655!

ZINC

Delivery of zinc and triclosan to micro-reservoirs of antibacterial activity. Gilbert, R.J., *et al.*, 1706!

Effect of a zinc citrate dentifrice on calculus formation, The. Gaare, D., 1710!

In vivo effects of zinc and chlorhexidine on dental plaque ureolysis and glycolysis. Giertsen, E., *et al.*, 1132

Inhibition of plaque formation, prevention and treatment of gingivitis with sulfadiazines in beagles. Howell, T.H., *et al.*, 1712!

Maintenance of gingival health by a dentifrice containing zinc citrate and triclosan. Saxton, C.A., 1724!

Modes of action of currently known chemical anti-plaque agents other than chlorhexidine. Scheie, A.AA., 1609!

Modified model cavity method for assessing antibacterial properties of dental restorative materials, The. Meryon, S.D. and Johnson, S.G., 835

Oral delivery of zinc from slurries and separated supernatant fractions of dentifrices. Tan-Walker, R.L.B. and Gilbert, R.J., 1708!
